

# ① Additional Issues

CFW Program meets <sup>by code, effects of sustainable forest</sup> the intent of the program  
different incentives/disincentives

- T & D ← Make sure included w/ <sup>whole public</sup> ~~in~~

Education <sup>& communication</sup> to meet groups where they are (not physical location)

Ignorance & apathy of public - lack of understanding OR the importance of forest to individual

Missing holistic view of forest & forest ecosystem services

Lack of consideration of Pollinator in forest Planning (2)

§ - Lack of

Public

Effective  
management  
to reduce  
invasive  
species  
on  
private  
land

BMP - not enforced - invasive  
Implementation & SO: 1 & H2O

Lack of comprehensive

BMP for FM

Current - Voluntary, not enforceable

- Lack of fire

(3)

Forest Strategy to address wildlife, RTE

Lack Early Successional Habitat

Lack Old Growth (defr: logging)  
- States Forest need old growth areas

Lack of transparent, Statwise planning for multi-use

- o Recruit & Retain Foresters & Resource Specialist

# Resilience <sup>of forests</sup> to Climate Change

(4)

Including  
Roads

Logging along

"Special"

populay trails  
highuse

①  
↳ access

② Viewscope

↳ Lack of <sup>use of</sup> landscape principles  
along Road & trails

- Landscape context when making  
mngmt decision / planning  
- State forest cumulative impacts of  
multiple sets

• Lack of cross agency / group  
collaboration - grant funding,

• Landowners change

(5)

Continuity of ownership

⇒ Control forest fire ⇒

Forest fire management -

Suppression, control, <sup>fire</sup>USE, prevention

→ impact on fund (feedback) & Resources  
ability to deliver program)

o Rural / Urban interface (6)

# Parking Lot

Methodology

Stakeholder Survey - broader input  
to private landowners  
- who sent to not just resource  
managers

- Plan → Legislators
- Questionnaire on if public is interested in spend more on Natural Resources
- group issues by categories
