

USING THE POTENTIOMETRIC SURFACE MAP

The purpose of this map is to depict regional ground-water levels and flow direction. Static water levels in individual wells may differ from the regional values mapped. More specific information is available from the Ground Water Section of the Division of Water.

EXPLANATION

- Potentiometric surface for unconsolidated aquifer systems in blue
- Potentiometric surface for bedrock aquifer systems in red
- Line of equal elevation, in feet above mean sea level
- Contour interval 25 feet
