CHAIRMAN DIENER: We call our Commission's meeting today to order, and please silence anything that makes noise. I don't know what those things are, but you all know. First item today is to swear in the reporter.

(Court reporter was sworn in at this time)

CHAIRMAN DIENER: I hereby appoint you the official reporter to prepare a true and correct copy of the minutes of the Commission's meeting and a transcript of today's hearings before the Commission. Thank you.

First item on the agenda is consideration by the Commissioners of the minutes of our December 10 meeting, which we previously distributed.

Comments? Questions? Corrections?

COMMISSIONER SCHENKEL: Move approval.

COMMISSIONER WEATHERWAX: Second.

CHAIRMAN DIENER: All in favor.

THE COMMISSION: "Aye".

2.3

CHAIRMAN DIENER: Minutes are so approved.

First item on the agenda today is a presentation by Centaur regarding last year's race meets and a preview of what they plan for this year. And I'll turn that over to Mr. Keeler or whomever, Mr. Brown, Mr. Elmore.

MR. ELMORE: I'll lead off.

2.3

CHAIRMAN DIENER: And everybody today, because there are some new people, but for purposes of the transcript and for the benefit of the reporter, when you address the Commission, if you'd spell your last name for the court reporter and for the Commission. Thank you.

Go ahead, Mr. Elmore.

MR. ELMORE: Brian Elmore, E-l-m-o-r-e, vice president of racing for Centaur.

Couple housekeeping items before I really get into the meat of the presentation today. You'll notice that blue suit and red tie is exactly what I'm wearing today. I'm very limited in my clothing allowance. Two weeks ago I went to get a new passport because mine had expired. It had been ten years. When the postal guy took my picture, he started laughing. I asked what was the problem, and I was wearing the same flannel shirt I wore ten years ago.

CHAIRMAN DIENER: I'm glad to hear that Mr. Brown runs a tight ship up there.

MR. ELMORE: We're frugal.

In starting out this presentation today, we appreciate being able to come in front of the

Commission and share some things. It would be very helpful, as we've been at it for 13 seasons, into the 14th season, Mr. Chairman, if you and the Commissioners might consider declaring a proclamation to the end of winter and the start of spring immediately. We would appreciate it.

2.3

CHAIRMAN DIENER: It might be premature based on this year's weather.

MR. ELMORE: Going forward. 2013 versus 2012 total live handle -- and this is all sources of monies, whether it be live, on track, simulcast, account wagering, whatever it is -- this is all money bet on live signals from either Hoosier Park or Indiana Downs. Hoosier Park -- and this is breed to breed, this is comparing the total number of breed days in 2012 to the total number of breed days in 2013 -- Hoosier Park saw a remarkable 25.5 percent increase in year-over-year handle, going from \$62.7 million to \$78.7 million.

Indiana Downs on the thoroughbred and quarter horse meet saw a 5.7 percent increase, from \$101.3 million to \$107 million.

Moving forward to the total commissions from all sources. Hoosier Park experienced a 35.5 percent increase; Indiana Downs, a

16.7 percent increase. And you may ask, well, why is the commission much greater than the handle increase, and it's this: By combining our two tracks, we were able to get a contract and work very closely with Churchill Downs simulcast network to be the provider of both of our signals. And due to their ability and the other tracks they market, along with their own, they were able to get us a larger commission on our signal that we send out.

So the results are very, very positive, and these are the things that we share with both the horsemen and within the state with the Commission on taxes paid.

CHAIRMAN DIENER: For purposes of the Commissioners, could you explain just very briefly what you mean by commission?

MR. ELMORE: Yes. The commission is the amount of money paid to an association for the providing of content to other jurisdictions for people to wager on.

MR. BROWN: Revenue.

MR. ELMORE: Revenue.

CHAIRMAN DIENER: Thank you.

MR. ELMORE: Yes, sir.

Moving forward, handle in millions. As you

2.3

can see, for a four-year period we were kind of trending downward. One breed, one track, consolidation of ownership, working our marketing teams together, working with the Commission and others, we were able to turn this around significantly. We had a 12.5 percent increase in handle in 2013 over 2012 to \$187.7 million. We're hopeful next year to take that to \$200 million.

More good news is we had a reduction by one-third in the number of catastrophic breakdowns. And that's something that we've talked about in the past. We continue to work on this, on how we set up our tracks, the consultants we use to make the safest race surface possible. You'll never eliminate this number. Our goal is to keep this as low as possible.

CHAIRMAN DIENER: Ouestion.

MR. ELMORE: Yes, sir.

2.3

COMMISSIONER WEATHERWAX: What is catastrophic breakdowns? Is this equipment or accidents?

MR. ELMORE: No, sir. That's an incident in which a horse is so severely injured that it has to be euthanized.

COMMISSIONER WEATHERWAX: Okay.

MR. ELMORE: 2013 was a year of racing

financial investments. Throughout 2013

Centaur Gaming invested more than \$10 million into upgrading the racing infrastructures and facilities of both Indiana Grand Racing & Casino and Hoosier Park Racing & Casino. Of the total projects undertaken and completed, the following represent the key investments in 2013.

2.3

At Indiana Downs we have the new barns. Those are each 76-stall barns, state of the art. We're very proud of them. It will allow us to stable another 304 horses at Indiana Downs this year. We will now be able to have 964 horses stabled on the grounds. Prior it was 660.

And if this gives you any idea the kind of job that we all are doing -- the Commission, the racetracks, the horsemen -- we had a record number of stall applicants this year of over 2,200 for the 964 stalls. So people know that we're out there; people want to come here.

Trakus at Hoosier Park, North America's only harness track is Hoosier Park using the Trakus technology. Those are chicklets that go inside each of the saddle pads that are tracked by GPS around the racing surface. It'll tell you the position of your horse -- first, second, third, and

fourth -- by how many feet, and in the end it'll give you a report of how many feet your horse traveled, at every fraction -- every quarter, half, three-quarter -- it'll give you your horse's time. This is something that's become very, very popular for race fans.

2.3

COMMISSIONER PILLOW: Brian, is this new, this Trakus?

MR. ELMORE: Trakus was developed about five years ago, Commissioner Pillow. And there's probably about seven thoroughbred tracks in the United States that use it, and we signed on as the first standardbred track to incorporate this technology.

COMMISSIONER PILLOW: Okay.

MR. ELMORE: The new Hoosier Park grandstands and clubhouse, that's having a big facelift.

And if I can, I'd like to call your attention to the lower left-hand picture. One of our wagering suites that are available for live racing. As you see, there's padded chairs, couch, and you'll notice a big flat-screen TV towards the front of the suite and the corner of a wagering machine in the back. There's food service available in these suites, and we think it's a very

nice enhancement for people that come out, group maybe, couples, sit there and watch, wager on horses.

2.3

The Hoosier Park and Indiana Grand racing surface renovations. Started in 2013 and set for completion before the start of live racing in 2014, more than \$1.5 million will be invested into the improvement of racing surfaces at both racetracks. Hoosier Park Racing & Casino retained the services of Charles E. Coon & Sons Incorporated, the leading builder of standardbred tracks in North America. Was hired as a consultant to improve the racing surface at Hoosier Park Racing & Casino.

At Indiana Grand Racing & Casino, Michael
"Mick" Peterson, Ph.D., University of Maine, and he
is the executive director of the Racing Surfaces
Testing Laboratory and the Libra Foundation
professor for the college of engineering at the
University of Maine. Dr. Peterson's research links
traditional understanding of engineering mechanics
and materials to the biomechanics of animals.
Dr. Peterson developed a passion for understanding
racing surfaces and established safety guidelines.

Also at Indiana Grand Racing & Casino, we consulted and brought in the services of

Butch Lehr. Butch served forty-five years as track superintendent at Churchill Downs. He oversaw the major track renovations of not only dirt but turf tracks at Arlington Park, Hollywood Park,

Calder Race Course, and the Fair Grounds in

New Orleans. He also was brought in to consult by the Sheikh in Dubai to oversee the renovation of the racetracks over there.

2.3

I can assure you one thing: That all our consultants and our track superintendents are teed up and ready to go. Soon as we get a little break in this weather, and the extended forecast is for the first time looking favorable that we'll be able to do work by the end of the week. I feel that we are on target to meet our opening date of March 28 at Hoosier Park and May 6 at Indiana Grand.

Now, I'm 90 percent sure at Hoosier Park and I'm 95 percent sure at Indiana Grand. And as Commissioner Pillow, back in his days as a power forward at Indiana State, and Mr. Schenkel with his association with the Pacers know that when the game's on the line and you're down one shooting one-and-one with a second on the clock, you want that 90, 95 percent free throw shooter going to the line. Our team is ready. We're ready to go. We

just need a little break in this weather. We'll go 24/7 and get this job ready. For whatever reason in the event that something catastrophic would happen, we would be in contact with the staff; and in the event we had to postpone opening day or two, we would come back with alternate dates to make up those days at some time later in the year.

2.3

That's 2013 on my portion. I'm now going to turn it over to my esteemed colleague, Jim Brown, president and chief operating officer of Centaur.

MR. BROWN: Thank you, Brian. I borrowed

Brian's suit for my photo. I'm Jim Brown. I'm the

president and chief operating officer for Centaur,

B-r-o-w-n.

I'd like to start my portion of today's presentation with something unique and extremely important to racing in Indiana now and in the future that occurred over the last year-plus. Starting with the acquisition of Indiana Grand that put racing in Indiana from an ownership standpoint in the hands of a company that is passionate about racing, has been involved in racing since its inception in Indiana, and feels that Indiana's racing product and sport and agribusiness deserves to be on the national platform.

One of the first items that we put on our agenda to work with the Commission and the horsemen on during the acquisition process was getting the right breeds at the right tracks. Hoosier Park is a 7/8 of a mile track built for harness racing. Indiana Downs is a mile dirt course, 7/8 of a mile turf course, that's built for thoroughbred and quarter horse racing. And we were able to accomplish that.

2.3

I think I heard Joe about a year ago say if we look at some of the accomplishments we've made, this is probably one of the biggest that we're going to see. And after the first year of one breed per track in Indiana, I completely agree with that statement.

The next step was favorable legislation in Senate Bill 609, creating a stable environment for racing purse monies and investment in racing in Indiana and those that wanted to invest in horse farms in Indiana, those that wanted to bring sires to Indiana, broodmares to Indiana, invest in Indiana racing, and every year sweated through is the money going to be taken away, am I making a multimillion dollar investment in something that I'm going to see a completely different purse

structure the next year that could potentially be cut in half. This stabilized that for years to come in an unprecedented move.

2.3

And followed by negotiations with our horsemen, who I've made a lot of new friends, and I know a lot of us did. It was great to see the breeds all working together to accomplish a goal of providing an agreement that we could go forward with that gave further stability to the industry of racing in Indiana for years to come.

Having accomplished that, I'm going to turn to marketing. I'm going to go back in time a little bit before I get to last year. This is a little bit more from Hoosier Park's perspective.

Jon Schuster, he was out, him and his team, literally with no money to capitally invest, not a lot of money for marketing or to continue to improve the perception of racing at Indiana Downs. They did an admirable job, in my opinion, running their meets, but were limited in their toolbox.

At Hoosier Park, after watching racing for several years once the casino opened, and looking at how we were presenting our product, what's happening with racing across the country -- and in that I mean handle declining year after year --

there was a message that went out in 2011, and I'll read an excerpt from that. It was on October 17.

2.3

We need to put a group of people together, management, staff from Hoosier Park. The purpose of the group will be to stop the bleeding in racing. We will discuss how to impact the serious player, the casual player, get more people out to the track, improve our export signal, our marketing efforts, our technical improvements, while creating fun and improving the perception of our customers at the track. And that got us started.

We put a group together consisting of a cross section of the entire management team at Hoosier Park, from casino marketing operations to information technology to everyone associated directly or indirectly with racing, and we started on a project. Now, already had the slot money. The fields were getting bigger. They were getting more competitive and we had a better product to present, but we weren't taking the time to present the product in all facets of how we present racing to our customers.

We spent two days locked in a room looking at our live racing product, the on-track experience to the core better, the casual better, the new

customer, the convenience of racing, how to keep it interesting, the show itself. At A lot of tracks you see the race, then it's dead, then the horses come out on the track, they introduce the horses, then they go to the gate, and the race is on. This is 2014, at the time 2012. Look at minor league baseball. Look at NBA basketball. Look at what's happened. This is a complete entertainment experience that folks need nowadays to keep them interested.

Without our core racing product and sport suffering at all but bringing new people into the track, new families, new casual betters, allowing them to enjoy three hours of entertainment on a daily basis. Attract them, educate them, and entertain them.

We looked at the live program, how to create fun in between racing. And this went from what music do we play on a race replay to completely redoing our Hoosier button, to creating celebrity race commentators that people could associate themselves with, to having an entire production schedule for every single night of racing at Hoosier Park.

We looked at the export signal of what people

2.3

were seeing across the country, what our templates looked like, how do we get shelf space. If you go to the grocery store and look at detergent, probably eight out of the twenty are made by Proctor & Gamble, but the labels bring people to them. There are people that bet on their tracks, but there's others that are scanning boards across the country and world looking for a race to bet. We needed to pull ourselves out front.

2.3

We also needed to look at what we were showing on the TV screens. If you have a camera pointed at the winner's circle at an empty apron on a weekday, people are going to say this is just some Midwest cornfield track. They want to bet at Madison Square Garden. So we actually have two production schedules with cameras. One goes to our local audience that shows the T-shirt toss and other things, and one stays focused on, if I'm in New York City, I think this is -- and it is -- a major league track with major league horses, drivers, and purses.

That was the level that we went to in each and every facet of how we present and how we market our racing product to our customers. We created an all-star driver program. Drivers are easier than

jockeys. They wear the same colors every night. You can create personalities, like NASCAR did, and we followed the NASCAR model. So there was a lot of heart, soul, effort, sleeves rolled up, time spent developing what was to be our racing product of the future.

2.3

Our OTBs, the model of make a bet, buy a hamburger, OTBs are closing across the country. We needed a new business model, something that incorporated a broader entertainment experience, and that included a pub, grill, and an OTB that you could bring your spouse to, that you could bring groups to, that you could have fun; but a guy that wants to sit at a carol and handicap all night, that they would have the experience that they want. That's what created the Winner's Circle brand that you'll hear a little bit more about.

We went through everything. I think we've covered most on here. Trakus is part of marketing. Typically at the end of the racing season, handle declines. Our handle increased once we had Trakus on the program where people could actually follow the races. Most races are broadcast in analog on tube TVs across the country. When those horses hit the stretch, let's watch a race together and see if

we can even tell what number's what half the time. Trakus changed the world in that respect.

This year, unprecedented agreement with HRTV.

We have more coverage than we have ever had. We

did have to pay our way in, but when we're on HRTV,

our handle moves materially.

CHAIRMAN DIENER: Question.

COMMISSIONER PILLOW: Jim, who owns Trakus?

MR. BROWN: Trakus.

2.3

COMMISSIONER PILLOW: But do you guys buy it?

MR. BROWN: No. We make a capital invest.

The ISA and us partnered in Trakus. So we invested money to put the Trakus technology at the track -- and that would be all the communication systems, all of the computer technology -- and then we pay an operating fee on a daily basis to them for operating Trakus.

Trakus is in front of the scene letting you follow a race. It's also behind the scenes giving you charts and clear and accurate information. You could even go to one of our pages behind our main website, and if you've ever played a horse racing video game, you can watch a duplicate animated version of the Hoosier Park track and watch the race as if you're one of the drivers, and you can

pick your horse to drive to watching the race overhead or watching the race as it was shown on TV.

It's been exciting, and we feel like we're getting a great return on our investment right now.

COMMISSIONER PILLOW: Thank you.

2.3

MR. BROWN: As you go through, we really tried to cover every facet of our racing marketing areas. Those are some of the highlights. And we saw the results last year, 2012, at Hoosier Park.

Hoosier Park's handle started to ramp up,

Indiana Downs was still declining, and last year both tracks, just it was a game-changing year for us. Adding one breed per track and the marketing efforts that were being made and the product that we had to market, most importantly, and our partnerships with everybody that we are partners with in this endeavor.

Part of our marketing was creating race commentators, getting them recognized. And I believe that in five, ten years we're going to see one or both of them on ESPN or someplace nationally. We have our race announcers, Steve and Bill, and our racing commentators, and they do a spectacular job. Since 80 percent of our customers

are male, we know it's better to have Rachel and Emily there than Gene and Barr (indicating). But both ladies are extremely talented, as the most important element of all this.

2.3

These are some examples of our racing partnerships and signature race showcases. And as we've upped the ante in terms of even TwinSpires, we have million dollar point days, we have multiple point days. Our handle through TwinSpires has gone up almost 40 percent in the last year on racing. TwinSpires controls approximately 10 percent of the national handle on horse racing in the United States today.

COMMISSIONER SCHAEFER: Jim, if I could ask. Do you pay them a percentage of the handle?

MR. BROWN: It's like export handle. When we were talking about handle and commission, commission is revenue. On our tracks betting live, we keep about 20 percent, pay 80 percent out. It's 18 percent on straight wagers, 21 1/2 percent on exotic wagers.

When races come in and we simulcast at one of our facilities and they bet at Santa Anita, say, we hold what Santa Anita would have held with what their take percentages are, but we pay them an

entertainment fee, which averages 3 to 4 percent.

At TwinSpires that's what the relationship is.

They pay us a fee for our outgoing signal. So if we have our signal shown at Santa Anita and somebody bets on us at Santa Anita, we keep between 3 and 4 percent of the handle. So at TwinSpires same relationship.

2.3

So right now our handle at both tracks during live racing is about 95 percent export, coming from all the simulcast and Internet outlets across the world. The commission or revenue, about 80 percent of it is coming from those sources and 20 percent of it is coming from on-track wagering.

COMMISSIONER SCHAEFER: How far does HRTV go?

MR. BROWN: Throughout the United States. And maybe in other places in the world, but throughout in the United States. That and TVG are the big players in race broadcasting.

And we had tried to get a better relationship with HRTV, but as Brian and I got told when we were talking to the CEO a year and a half ago, we make more money showing taped equestrian racing at night than showing live racing and that's our business model. He didn't want anything to do with us. And they've changed their business model, and we've

bought a package that they're here for all our major races and we have a supplemental package this year that we're on as much space during the live racing nights as they'll give us.

And because of our relationship with Churchill Downs simulcast network, we're not allowed to be on TVG.

2.3

An increase in racing-centric advertising.

I'm sure you've seen some or all of these out

there. TV commercials that we've been dotting

coverage over the past year, radio, billboards,

newspapers, and we have more planned.

Themed days and stakes race days, and I'm going to jump to 2014 for a moment with some things that we have planned for 2014. The Dan Patch. Our meet, even up to last year because we weren't on one breed per track, was centered around at Hoosier Park harness in the spring, Indiana Downs harness in the fall, so our stake schedules were based on that and the Dan Patch ran in May.

This year we have the full race year to reposition the Dan Patch stakes. Everybody puts their major stakes races on Saturdays. Well, you find a fair amount of thoroughbred stakes races these days moving to Sunday because Saturday's more

saturated.

19

20

21

22

2.3

24

25

We looked at the Dan Patch and said, You know Our live handles are strong and our export what? handle is even stronger on Fridays than it is on Saturdays. We'll be able to get better horses on Fridays and drivers because of commitments on Saturdays. Let's make it a Dan Patch festival weekend. And we're hosting the Dan Patch stakes on a Friday night. Saturday we have a special racing program. We're going to start a little earlier, and then we're going to end the evening with a concert by the national country act, Little Big Town, and fireworks. So we're turning Dan Patch into a weekend event.

And although we haven't finalized plans for the Indiana Derby, the Indiana Derby festival will be bigger and better than anything we've seen before.

With our celebrity driver program, we're starting a competitive aspect to our celebrity driver program. Although this is now proposed, not finalized or approved, at mid-meet -- well, it's the all-star driver program -- we're going to make it competitive. We're going to take our top 10 drivers at that time, have them race against each

other in five races that owners agree that by pick of the draw the driver that picks their horse will drive their horse. They're going to earn points.

So it'll be a competition that night that we think we'll get a heck of a lot of publicity for. Will be fun for the drivers, the owners, and especially our fans.

Then we're going to wrap it up in the fall with a final championship, and right now we're talking about prize money or maybe even a one-year lease on a Corvette or something for our winning driver of the two-night series.

On Dan Patch night we're putting together an East meets Midwest all-star driver program, because we'll have a fair amount of East Coast drivers that are big names here, and we're trying to put together three races that they by the luck of the draw pick a horse and make it competitive from a driver's standpoint.

So those are some of the plans we have for this year that fit specific points in time. We've done so many other things. We're making Friday nights fan night. We do a dollar beer, a dollar hot dog, and if you buy both, you get a free program. And I can't tell you how many young guys

especially I see out at the track that are just watching, drinking their dollar beer; you put a program in their hand, a month later than handicapping horses trying to out-pick their friends.

24

25

Saturdays are family fun day, and we do a lot of events surrounding bringing families out to the track. And we're going to do more with farm festivals and other things on Saturdays this year at both tracks.

There is a lot more that has been done, will be done in racing marketing, and it's through our partnerships with our associations, authorization by the Commission, and the hard work of the teams at Hoosier Park and Indiana Grand. As we talked about Jon at the beginning that he didn't have the toolbox, I think Jon and our entire team at Indiana Grand last year teed things up. This year they have a beautiful new tote board with a jumbotron, a completely renovated track, more barns to put more horses in, a new starting gate, and a lot of new fun things in the grandstand and clubhouse. So this year we're moving both up, and everybody's very excited about an exciting 2014 race meet.

Racing is going to have a slightly different look in 2014. And since we're integrating the properties and we have Hoosier Park Racing & Casino, we now have Indiana Grand Racing & Casino. But we were always a two-headed monster, Indiana Grand Racing & Casino and Indiana Downs. We've done some work on this.

2.3

We wanted to dissolve the Indiana Downs name. It didn't fit with creating the brand we're trying to create, fully driving Indiana racing to a national premier level and getting both gaming and racing products under the same umbrella. Better aligning the properties of Centaur's goals of providing guests with a fully-integrated gaming and racing experience. And also taking our Winner's Circle brands and moving forward with them.

This is the new Indiana Grand Race Course logo, and Indiana Downs will now be known as Indiana Grand Race Course. We researched track names across the country, and if you look at premier tracks, from Keeneland to Saratoga, you'll see Race Course, Raceways, Downs, Parks. The list goes on. Felt this was the best fit for Indiana Grand when we're doing racing-centric

marketing, which would be Daily Racing Form,

Equibase, Brisnet, advertising the Indiana Derby.

99 percent of the time we'll be using Indiana Grand

Racing & Casino, like we do at Hoosier Park that's

known as Hoosier Park Racing & Casino.

2.3

We also wanted to promote the fact that this is Indiana racing. This is Indiana agribusiness. Indiana is an emerging racing state across the country and not something that's being swept under a carpet. We're moving to national prominence, and we wanted to get the state logo in an exciting logo.

We also added to the Hoosier Park logo for racing-centric needs and purposes. And from time to time you will see the Hoosier Park Racing logo, but mainly the Hoosier Park Racing & Casino logo.

We did some real work on how we present our simulcast product. That's the old Indiana brand simulcast graphics template that my staff with a few people at the Winner's Circle one night last year were looking at Hoosier Park and Indiana Downs, said, Why can't Indiana Downs look as good as Hoosier Park? We do have an outside company, but we needed to do some work, so we did some work.

That's what you'll see on TV this year. And we're very excited about the Indiana Grand simulcast graphics package and have done some work on cameras and some other items associated with what we'll be presenting to fans on TV at the track and across the country.

2.3

We also did a little work on Hoosier Park, and traded some gradation in an effective template.

You don't see Trakus yet because the race hasn't started. But that's the look of identifiable sister tracks in simulcast and on live on-track racing this year.

The Winner's Circle, we feel we've hit a model that works. We have a Winner's Circle Pub, grill and OTB, in Indianapolis. We're in the process of relocating our Fort Wayne OTB to the New Haven area, and our Fort Wayne product will be the Winner's Circle Brewpub & OTB.

At Indiana Grand, the Grandstand Sports Bar, we have now closed effective Monday, and by late May we will be reopening as the Winner's Circle Brewpub & OTB at Indiana Grand Racing & Casino.

And that will work alongside the racing building, our simulcast center there, and our clubhouse and grandstand during the live meet.

We have some exciting surprises, we believe, in store for our customers in this outlet, through TV walls and the products that we offer in a brewpub theme. And we're hoping that we're able to take this to Clarksville next year. That's on the drawing board. Clarksville is an aging dinosaur, but our most profitable OTB.

CHAIRMAN DIENER: Any plans for the Merrillville facility?

MR. BROWN: Right now we're discussing that.

CHAIRMAN DIENER: Okay.

2.3

MR. BROWN: Think we're going to go back to Brian.

MR. ELMORE: Thank you, Jim.

MR. BROWN: Thank you, Brian.

MR. ELMORE: Brian Elmore, vice president of racing, Centaur.

As we move forward, you ask what is next.

2013 racing saw many investments in the racing infrastructure, racing fan on-track and simulcast experience, and the overall quality of life for our horsemen. 2014 season will see the completion of some of these efforts, as well as the beginning of new initiatives to improve Centaur Gaming's overall racing product.

Investments in improving the racing experience will include the completion of track renovations for both racetracks; the expansion and further promotion of signature races, like the Dan Patch and Indiana Derby that Jim touched on; an amazing new Indiana Grand video and tote board. And that video is in place now and they fired it up last week, and if you can imagine something slightly than that mural, almost the size of that wall, 18 1/2 by 32 1/2 out there in the infield now, and it lights it up and it's a beautiful scene. I can't be any more happier with that addition we're putting in up there this year.

2.3

Racetrack infield landscaping at both racetracks. As Jim mentioned, this is very important to our simulcast customer. They like to see things that look nice and pretty and look like they're first class, and that's what we want to provide.

Jim touched on the Winner's Circle Brewpub & OTBs. We also will have a new starting gate at Indiana Grand and a new starting car at Hoosier Park. We will complete our NTRA accreditation at Indiana Grand. And we look forward to beginning the start of construction of

100 new quarter horse stall barn at Indiana Grand.

2.3

Some of the investments we're making in the quality of life for our horsemen. At Indiana Grand the renovations of the existing dorms and the construction of 45 new dormitories, which will be larger. Construction of the Hoosier Park driver's lounge, horsemen's recreation area, and office space for chaplain and ISA representatives.

Indiana Grand will renovate backside food outlets, along with the opening of a convenience store.

Construction of an Indiana Grand recreational horsemen's soccer field. And off campus, located in Shelbyville, Centaur has committed \$2.7 million over eight years for the construction of equine surgery center.

CHAIRMAN DIENER: Brian, I just want to interrupt you for a minute. Just let you know something dear to my heart. I'm very glad to see the items 1, 2, 3, and 4 you have there. Those are things that none of us ever see visually, but they do a lot to improve the quality of life for people on the backside. I applaud that.

MR. ELMORE: Absolutely, Mr. Chairman. Thank you.

So in addition to the brick and mortar

investments. Every time a rider's legged up on a horse, there's a risk of injury to both the equine and human athlete. It's a dangerous sport. At Indiana Grand we've entered into an agreement with the Jockey's Guild. Our agreement will provide increased benefits for the jockey in the event they suffer temporary disability, the need of life insurance, accidental death and dismemberment, and permanent disability benefits.

2.3

The Guild pledges to work with the track and the regulators to improve safety, provide valuable input regarding rules and regulations, and to help market the sport within the community and within our state.

Lastly, March 29 of this year at Tampa Bay
Downs, there's going to be the first annual what's
called Jockeys and Jeans, and Indiana Grand Racing
& Casino will be a participating sponsor of this
event. Jockeys from across the nation will gather
to honor their fallen comrades at Jockeys and
Jeans, the nation's only charity event organized by
former jockeys and other former riders, with
proceeds going to the Permanently Disabled Jockey
Fund.

Hosted by Tampa Bay Downs, it will feature an

autograph session by famous riders, including several members, catered barbecue luncheon, and programs featuring real-life, yet uplifting stories of former jockeys whose successful careers ended with catastrophic injuries.

Since 1940 there have been 150 North American riders who have been killed in racing or training incidents. Ronnie Turcotte, winner of world-renowned Secretariat, is one of over 40 former jockeys made paraplegics in racing accidents. During 2011 and 2012 almost one in every five Jockeys Guild members suffered career-interrupting spills. In recent years famous riders Ramon Dominguez, Higar Solo (sp.), Richie Nugori (sp.), Jose Santos, Rene Douglas, and quarter horse great Jacky Martin suffered debilitating, career-ending injuries.

This event presents a rare opportunity to partner with great riders who come together at their own expense to honor their less fortunate brothers and sisters and pay tribute to this group's courage and fortitude as they build new lives.

I'm so happy that Mr. Schuster and the team from Indiana Grand will be going down there. Our

intent is not only to participate in this. But we have talked to the committee members on this,

Jockeys and Jeans, and we will be visiting with them and it's our intent to try and bring this event next year to Shelbyville. It only makes sense to hold this in the Midwest, where you're in close proximity to Louisville, Lexington,

Cincinnati, Columbus, Chicago, St. Louis, because for so many race fans to have the opportunity to come, mingle, have dinner, ask questions with hall of famers and guys that have been a pioneer to this sport would be a wonderful opportunity. We're hopeful to be successful in doing that.

2.3

I could not be any prouder to work with the company I work with. The commitments that Mr. Ratcliff and Mr. Brown are making, we're investing in our backside facilities, we're enhancing our racing fan experience, we are remembering and acknowledging the needs of the backside grooms, we're helping to build an equine surgery center to take care of the horses, and now we've taken that two steps further in our agreement with the Jockeys Guild and our willingness to participate for those riders that have been permanently disabled. I want to applaud this

Commission. I want to applaud the horsemen that are here today. I just wanted to let you know I could not be any prouder to be working for this company here in this state.

I'm going to turn it back over to Jim.

MR. BROWN: Thank you, Brian.

We're sending five people down this year to see the event, participate in the event, and hopefully bring the event to Indiana Grand next year.

COMMISSIONER SCHAEFER: Is this the first year?

MR. ELMORE: Yes, it is.

MR. BROWN: Yes.

2.3

Indiana racing. Our achievements were the result of a partnership between the Indiana Horse Racing Commission, its staff, our General Assembly, the horsemen, their associations, and the Centaur team. And as our theme has been throughout the year, we were all in this together. The IHRC played a large part in the success of the industry. We could not have done it without you, and on behalf of Centaur and all participants, thank you, sincerely, from our hearts.

2014 is shaping up to be another great year.

Indiana Grand and Hoosier Park are now in the midst of entering premier racetrack status on a national scale.

24

25

This is just a symbol with our Hoosier Buddy of when we go back to marketing, how we presented our racing product before and today. And for what fun it may be, this really does sum it up in so many ways; that we've learned over the years what's important to our customers, what's important to our horsemen, what's important to our industry, the partnerships that are so important, the collaboration and cooperation that's so important, the determination, the initiative, the teamwork, and the true commitment of purpose that has gone on collaboratively between our horsemen, our associations, our teams at both properties, our Racing Commission, and other stakeholders and constituents to truly take the old Hoosier Buddy and turn him into the new Hoosier Buddy.

Indiana racing is on the rise and continuing to rise, and I think we're going to see for years to come Indiana racing become more prominent in the national scene.

And although I didn't write a full

all together materially enhanced the quality, the safety, the integrity, the fun, the sport, the visibility, the customer entertainment, and customer appreciation of horse racing in Indiana, and for that we should all be very proud and looking forward to the years ahead. Thank you on behalf of all us at Centaur.

CHAIRMAN DIENER: Thank you, Mr. Brown.
Mr. Elmore, thank you very much.

Questions?

2.3

COMMISSIONER SCHAEFER: No. What did

Brian Elmore do with his Hoosier Buddy costume?

MR. ELMORE: Unfortunately it fits.

MR. BROWN: Well, we are putting together a mascot for Indiana Grand Race Course, so we do have a candidate in mind. Because it's only two days a week that we'll need him to be in costume, and he does fit it and he does look better in it.

CHAIRMAN DIENER: I just want to note that in most states that have racinos, horse racing is simply an entry level to get your slots. It's an entry fee, a little stepchild. And Mr. Ratcliff assured us that was not going to be the case here, and his assurances have borne out. He's got a

solid management team with Mr. Brown, Mr. Elmore,
Mr. Schuster, and back again Mr. Moore, and it's
good to see that horse racing is still front and
center. Indiana may not be yet California,
Kentucky, or New York, but there's not many states,
if any, that have shown a big increase in the live
handle year over year.

So my own personal comments are kudos to the team of Centaur Gaming and what you've done with horse racing.

MR. BROWN: Thank you. Thank you for allowing us to tell the story.

COMMISSIONER SCHAEFER: Second.

MR. BROWN: Thank you.

2.3

COMMISSIONER SCHENKEL: Good job.

CHAIRMAN DIENER: We've got a full agenda.

Rather than breaking now, we're going to start with

No. 2. Item No. 2 is likely to take a little bit

of time. And I'm going to wear the hat of at least

introducing medication rules and what we've done

here at the Commission, and then turn it over to

Joe and he can talk about RCI and who they are and

how this came to fruition. There are some

representatives here that Joe will introduce.

With that, we'll just get started. RCI is

Racing Commissioners International. On April 20 of last year, about eleven months ago, that entity gave final approval to the Controlled Therapeutic Medication Schedule. That is a list of 24 substances. Substances not on that schedule would be prohibited from horse racing. On July 31 RCI approved a penalty point system for suspensions for trainers with multiple medication violations.

2.3

To date, I believe 17 states have passed these model rules of RCI or those rules are in the process of adoption. No state has yet rejected these model rules, although they still are under consideration in several states. New York, Ohio, and Pennsylvania will have separate rules for each breed. Whether or not they're different, I don't have that information, but I know they will be separate. Whether they acknowledge any differences, I do not know. The model rule for the penalty point system has been approved in seven states and it's being considered in numerous other states.

On September 18 of last year, Dr. Angela

Demaree, the Commission's Equine Medical Director,

distributed for comment within Indiana to the

industry, to veterinarians, etc., both the RCI

medication rule and the penalty point system that had been adopted. Comments have been received from numerous entities. The Indiana Quarter Horse Association generally supports both the rules.

2.3

The Indiana HBPA was also generally supportive of the concept, but they had some objections and concerns about having only 24 approved medications as well as proposed changes to the penalty point system. Similarly, the ISA generally was opposed and felt more time should be considered before adopting anything.

On November 25 of last year, the

Racing Medication and Testing Consortium -- that is
the group that ultimately came up with the proposed
recommendations to the RCI -- addressed the
concerns of the Indiana HBPA. Similarly, on
December 20 of last year, representatives from RCI
addressed the concerns of the Indiana HBPA.

The main issue, as I get it, is the medication thresholds for clenbuterol and anabolic steroids is an issue, particularly for standardbreds. And secondly, whether there should be different medication rules between thoroughbreds and standardbreds. Now, on that issue I'm not smart enough. I figure a horse is a horse is a horse, so

I don't know the differences. I think it has more to do with how the trainers like to race their horses, kind of the economics, rather than anything to do with the equine health and safety.

2.3

That's what we've done here in Indiana to date. Before the Commission this morning, we have proposed emergency rules, which do adopt the medication thresholds for the 24 substances listed, with some minor tweaks maybe in some of the procedures but not the substance of the threshold levels, as well as rules to do the penalty point system for multiple violations.

That's just a quick overview. With that, I'll turn it over to Mr. Gorajec to go over staff review, staff's comments, and make some introductions of representatives here today.

MR. GORAJEC: Thank you, Chairman Diener.

I will start with an introduction. Over the past twenty years, the Commission has used exclusively one primary laboratory for testing all of its equine samples. That laboratory is Truesdell Laboratory located in California. Every so often, every four years or so, the contract for laboratory testing services comes up for review, and the Commission staff works closely with the

State Department of administration to solicit proposals from all laboratories in the country interested in bidding on our services.

2.3

So every four years or so over the last twenty years, we've gone through what we would call an RFP process, request for proposal, and over the last twenty years the State of Indiana, more specifically the Department of Administration, has selected, with our input and recommendation, Truesdell Laboratory.

Truesdell Laboratory has done a fine job for this Racing Commission. We are closing the book with regard to Truesdell Laboratory, in the fact that they did not prevail in the last round of the RFP. There was a process that we started this past fall. We had a couple laboratories bid on our services, and the Department of Administration, with our blessing and recommendation, chose a laboratory located in Lexington, Kentucky, known as HFL Laboratory.

Their lab director, Dr. Rick Sams, is here.

Rick is known amongst my peers as one of the elite racing chemists in the country. I've known Rick for well over twenty-five years. When I got out of the racetrack management administrative end of the

business and went to the regulatory end of the business in the late 1980s, Rick was the racing chemist at the laboratory at Ohio State University. He subsequently moved on to Florida, and now he's managing the lab in Kentucky. We're going to be looking forward to working closely with Rick.

2.3

In addition to being the laboratory director at HFL, Dr. Sams is known to myself and my peers as one of the go-to guys in the business with regard to anything medication. Dr. Sams serves on the RMTC, Racing Medication and Testing Consortium; he serves on its scientific advisory committee; he's also the chairman of the RCI, Association of Racing Commissioners International, veterinary pharmacology subcommittee. So like I said, he is a go-to guy. We'll be going to him this year and improving testing for our equine drug samples.

Dr. Sams, delighted to have you on board.

DR. SAMS: Thank you very much.

CHAIRMAN DIENER: Welcome. Nice to have you here.

DR. SAMS: Thank you.

MR. GORAJEC: With regard to the rules that we have in front of us. One of the few success stories in horse racing regulation over the last

ten years has been the creation of the RMTC, and that's the Racing Medication and Testing

Consortium. We have their executive director,

Dr. Dionne Benson, here with us. She will be making the presentation on these rules and regulations.

2.3

The RMTC is a racing stakeholder group that includes basically a who's who of every special interest in horse racing that sits at a table and tries to design proposed rules and regulations for our trade association. The RCI considered to strive for uniformity in medication regulations. They are focused on safety; they are focused on integrity; and they've had some major successes in moving the racing industry forward in those areas.

One of which, going back, I want to say, six or seven years, a decade ago, it was very common for horses to be racing in every race in the country on anabolic steroids. Not every horse in the country was on anabolic steroids, but it was so prevalent it would be difficult to find a race where horses were competing that didn't have anabolic steroids in its system. Because it wasn't a banned substance and it wasn't a highly-regulated substance.

Through the good work of the RMTC and all the stakeholders in the business, they came together; they did the research, which is very important; they made a proposal to the RCI, which the staff did; and then from state to state the RMTC went and made presentations in front of racing commissioners, and one state after another passed model rules on anabolic steroids. Now -- Dionne can correct me if I'm wrong -- I don't believe there's a state in the country that allows anabolic steroids to go unregulated.

2.3

Now we have another wave of rules in front of us. I wouldn't call these particular rules myself reform, although there is a safety aspect to it, although there is an integrity aspect to it. In my mind this is the industry striving for uniformity.

One of the things that we've heard over and over again for well over twenty years -- I've done research and gone to the library at Keeneland and looked up old Blood-Horse magazines from the 1930s and 1940s -- where people have lamented the fact that there are not uniform medication rules from state to state, so horsemen training an animal in one state has certain medication rules that he has to know but if he's going to another state there's

a whole set of other medication rules.

We used a basketball analogy a while ago, and we know we have people involved in that particular sport sitting on the Commission. It would be like having the rim at 10 feet at one arena and 12 feet at another and a foul line that was different from arena to arena.

So there's been this strive for uniformity. It's very, very difficult to come by, and one of the reasons is the devil's always in the detail. People say they want uniformity the same way they say they want integrity. But when push comes to shove and you look at the details, there's always people that can pick apart the details and say I like A, B, and C, but I don't like the rest.

The rules that the Commission has in front of them that Dionne will present, I would encourage the Commission to consider. I would encourage the Commission to consider favorably. I would ask the Commission to consider without making changes to those rules. And the reason I say that is that to the extent that these rules are going to be uniform from state to state, if every state takes a look at these rules and changes one or two things, if we

change one or two things and Illinois changes one or two things and Kentucky changes one or two things, well, that defeats the entire purpose of uniformity.

2.3

These rules came from the RMTC. The RMTC then ponded these rules to the RCI, Association of Racing Commissioners International, which is our trade association, which is the trade association that we belong to, that we've paid dues to for the last twenty-five years. It's an association of racing regulators. They've looked at these rules, and the people who voted to approve these rules are people like you and I, commissioners and executive directors.

But above and beyond that, the RCI has a committee, which I referred to a moment ago -- and that is the veterinary pharmacology committee -- it's a subcommittee to a committee called the DTSP. The DTSP stands for Drug Testing Standards and Practices. It's a committee of the RCI that's focused on drug testing. It's focused on integrity. That committee has experts that are credentialed in the fields of the veterinarians, the racing chemists, Dr. Sams, people like Dr. Sams have all looked at this particular proposal.

So without further ado -- I like to give you that little background -- I'd like to introduce Dr. Dionne Benson, Executive Director of the RMTC. She's been spending most of the last several months flying from Commission to Commission, state to state, preaching the good word on these rules.

We're delighted to have you here.

2.3

DR. BENSON: Thank you very much for having me. My name is Dr. Dionne Benson. Last name is B-e-n-s-o-n. I'm very happy to be here. I was actually in Florida yesterday so the weather's a little bit of a change, but other than that, it's just fine.

I think that one of the most important things I can do for you, other than answer any questions you have, is certainly to take you first through the process of how we came up with these rules -- it's a very measured process -- and secondly talk to you about some of the misconceptions.

I'm going to actually start with one of the misconceptions that we hear often, and that is that the 24 therapeutic medications is a closed list.

That's never been the intention. As new research is completed, as new medications are discovered or developed, this will be a living document, so to

speak. In fact, at our board meeting in March, I'm presenting a document that will outline the process to formally add medications to this list. So any discussion about this being a closed list and there are only 24 drugs and that ties the hands of the veterinarians, that is not the case.

2.3

Secondly, oftentimes I hear veterinarians' and trainers' concerns that they can't medicate their horse. These horses have problems and they need medication. We have no problem with people medicating horses. It's whether they can run on a specific medication. We don't prohibit any appropriate medication from being used or even being kept on the backside of a racetrack. What we are concerned about is the integrity and safety of the horse and whether that horse should actually have that medication and at what level in its system at the time that it actually competes.

There are currently 24 thresholds. Those thresholds are also open for review. We're revisiting a couple of them at this point. As those revisions come through, they will go through the same process that I'm going to describe.

So essentially the way the list of 24 came about is there was a meeting in Baltimore that was

called by RCI, and RCI asked individuals, from chemists and racetrack veterinarians to racetrack regulating veterinarians, to come in and discuss what medications they felt were crucial to have available to them to the point where they would be in a horse on race day. This is where the list of 24 came from, this initial list.

2.3

We also had a preference for those medications that were FDA-approved for use in the horse. If there were no FDA-equivalent or there was a strong need for an additional medication that was not FDA-approved for use in the horse, we looked at those that were FDA-approved for use in another species -- dog, cat, human -- and then finally whether there was significant research to show efficacy, safety, lack of side effects, racing integrity, as well as health of the horse. So we were really deliberate in how we chose these specific medications.

CHAIRMAN DIENER: Can I interrupt you?

DR. BENSON: Yes.

CHAIRMAN DIENER: Quick question. When you say we, who is the we?

DR. BENSON: So in the group that RCI pulled together, it was Dr. Tom Lurkin, who's a practicing

veterinarian; Dr. Sams; Dr. Stanley, who's a chemist at UC Davis. Dr. Soma was there for some of the meetings, as well as Dr. Uboh, who are both from Penn. Dr. Tobin from the HBPA represented the HBPA there. Dr. Maylin from New York testing lab. Dr. Hovda from the Minnesota Racing Commission was there. So it was a wide variety of individuals.

2.3

CHAIRMAN DIENER: Were there any standardbred representatives? That's my specific question.

DR. BENSON: Dr. Hovda regulates both standardbred and thoroughbreds. Dr. Sams and Dr. Stanley and Dr. Soma are in jurisdictions where both breeds race. There was not a specific private veterinarian on that committee, but I can get to one later where we actually asked an individual who practices privately as a standardbred.

CHAIRMAN DIENER: My point is: This was just not a closed group dealing only with thoroughbreds. Came up with model rules for all breeds.

DR. BENSON: Not at all. As I'll describe, from that group the RMTC scientific advisory committee took the list.

It was funny. I went through this morning to write down the individuals, and it's some of the same individuals. I looked at the number of years.

You can look at me and say I'm a younger veterinarian, I don't have much experience, how do I belong up here in front of you making these recommendations. You're not hearing the recommendations from me.

2.3

The scientific advisory committee, when I totaled up their experience, conservatively they have 300 years of experience in horse racing.

Dr. Sams, he's had 30 years as a lab director.

Dr. Arthur, who's the equine medical director in California, he's got 20 years in private racetrack practice and he's the equine medical director in California since 2006 for both standardbred and thoroughbred as well as quarter horse. Dr. Maylin from New York, he's got 30 years and deals with multiple breeds. Dr. Stanley, also from California. Petra Hartmann from Industrial Laboratories, she tests for jurisdictions that have thoroughbred, standardbred, and quarter horse.

Dr. Knych and Dr. Robinson are RMTC postdoctoral grant recipients, and they've done so much research in the last three years while they have been under the grants. They've done more research in corticosteroids, clenbuterol,

butorphanol, dantrolene, pyrotoxin (sp.), tramadol, flunixin, ITTP, shock wave. I mean, the list is just very impressive, the amount of work that they've gotten done.

2.3

Dr. Hovda, again, she's a veterinarian. She has credentials with the American College of Veterinary Internal Medicine Specialists. She's also a human pharmacologist and teaches toxicology.

We're not talking about lightweight people in this industry. We've got private veterinarians, surgeons, and other equine medical directors. So it's a very diverse group; it's a very well-rounded group; and, again, like I said, as I totaled them up this morning, I figured they had well over 300 years of experience, which is pretty impressive, on that list.

So talking about the thresholds. There are generally two kinds of thresholds on that list.

One group is historical. The butes, the bamines, those are historic thresholds that have been around forever. What makes it easy for you is these will not change. We will be keeping the same thresholds that you currently have. We're recommending that you maintain the same thresholds that you had in your rules prior to the enaction of these

thresholds.

2.3

Then the second way we look at thresholds and develop thresholds is through research. We either do research that's sponsored by RMTC or research that's sponsored outside of RMTC. Now, either way when we do research, we do what's called a 95/95 tolerance interval calculation. I promise I won't go through the statistics. It's not fun.

Essentially I want to get the point across that usually these are three or four standard deviations away from the mean. What that means is they're very conservative. We have very conservative thresholds. In other words, a horse is very unlikely to test positive by following the guidelines under the threshold.

It's the same calculation done in Europe on milk. So if you were going to administer a drug to a dairy cow, that same determination is made when is the milk safe to drink. So it's conservative, safe, and it also takes into account the number of horses in the study. If we have six horses in the study, it's actually a more generous threshold than, say, twenty or twenty-two where it becomes more conservative. The goal of all this is, to the best of our knowledge, make sure that the

thresholds are set at a point where they don't interfere with the integrity or safety of racing.

2.3

It doesn't account for a potential interaction between drugs. We really anticipate that the veterinarians who have been doing these risk assessments all along can determine how many medications or which medications might interact together to increase the length of time for clearing a medication.

One of the things that we have had and one of the concerns that have been raised is by the standardbred community, specifically as it relates to corticosteroids and clenbuterol. We prepared two white papers, which are in your packets. We actually, after the standardbred community came to us, talked to us about these issues, we formed yet another subcommittee. So it had been through the scientific advisory committee, the RMTC board. It then went on to RCI, where it went through another two committees.

The USTA came to us and said, We're concerned about these two drugs. We said, We're happy to take a look at it. We'll appoint another committee. We'll get a practicing standardbred vet to participate. We ended up having a subcommittee

that was largely made up of our scientific advisory committee. We also added Dr. Bramlage and Dr. McElroy (sp.), both surgeons who are experts in corticosteroids. Dr. Bramlage sees probably more racehorses than most veterinarians will in their life. Dr. Scott Haag, who's another practicing vet, and Dr. Paul Nolan, who is a standardbred veterinarian in Pennsylvania.

2.3

We came up with consensus statements. In other words, these were not released until all parties were okay with it. It wasn't a matter of majority rules and the standardbred interest lost out. In fact, the only person on that committee that had no ties to standardbred practice at all or no regulation was the one thoroughbred practicing veterinarian. So everyone else saw or had regulated or did surgery on standardbred horses as well as other horses.

The ultimate recommendation of that group was that -- as you said, apparently I'm not any smarter when it comes to these issues than you are -- a horse is truly a horse and there was no physiologic difference with regard to how these medications work in these horses that justified different regulations. So we looked at that issue again;

that went back through our board; and we released the white papers, which I hope are fairly explanatory the concerns that were raised by the committee.

CHAIRMAN DIENER: I'm sorry to interrupt.

Clenbuterol, if I understand it correctly, is a bronchodilator --

DR. BENSON: Yes.

2.3

CHAIRMAN DIENER: -- but it has the effects of an anabolic steroid.

DR. BENSON: Correct.

CHAIRMAN DIENER: And clenbuterol is prohibited in any human athletic contest?

DR. BENSON: Absolutely, yes. Clenbuterol is completely banned in any human sports. It is allowed for horses for the bronchodilator and it thins mucus secretions in the trachea, so it allows them to cough up easier. Doesn't actually cause them to cough, but thins things so that they can cough it up easier.

CHAIRMAN DIENER: One of the medications being considered now, I think -- correct me if I'm wrong -- something like albuterol, which is a bronchodilator but does not have the negative impacts such as an anabolic steroid.

DR. BENSON: Correct. Albuterol will be on our board agenda for March 17 for a threshold to be approved.

2.3

CHAIRMAN DIENER: That's about all I know enough to ask the questions. Sorry if I appear too dumb. That's the way I was looking at it.

DR. BENSON: Not at all. Actually, you hit it right on the head. The problem that we have with clenbuterol, even a short horse. There's some research that hasn't yet been published, but it is included in our white paper -- it's actually being prepared for publication and comes out of the University of Pennsylvania -- that talks about the decrease in fat in the rump, which is an anabolic effect. It's decreasing fat, increasing muscle.

The decrease in rump fat, which they measure with ultrasound, didn't appear until day six. So on a low-dose treatment, which we've recommended, at day six you've already started seeing a significant anabolic effect. Well, they also looked at the tracheal ciliary mucus, so the clearance of the stuff in the throat. That also did not appear significant until day six. So they're very much tied together, unfortunately.

The other problem with clenbuterol is if you

give it to a horse for two days, you can't determine whether that horse has been on it for two weeks getting the anabolic effect or it's just been on it for two days. In fact, most veterinarians that I've spoke with don't believe that a two-day course is effective. They don't see a difference with those.

2.3

We're also working on other medications, some expectorants that will help. We have a couple on the list -- glycopyrrolate is an expectorant -- and we're looking at adding more.

CHAIRMAN DIENER: But until you get to that point. I'm a trainer of a standardbred. I'm used to racing my horse every week, once a week. So your proposed rule has hurt my only economics, standardbred racing. What do you say to that?

DR. BENSON: Well, in part, the issue of integrity and safety and health of the horse to me is paramount over the economics of the sport. Now, I'm not unsympathetic, and I do think that before too long we will certainly have albuterol. And more than that, we will have guidance very quickly on how long albuterol can be tested for. At this point we're looking at about four days. It's going to be about a four-day withdrawal time. So that

will come very quickly.

25

We're very diligent about getting our rules in front of the RCI quickly, which means that we will have that to them by their April meeting, and hopefully if that passes. They've been very receptive. Provided it passes my board and RCI, it will be available middle of April, so that information will be out there. We try to give as much information as we can when we set out these rules.

CHAIRMAN DIENER: I understand. I know your focus is only on equine health and safety, but this Commission has some other factors to consider. I'm going to ask Mr. Elmore, Mr. Moore, somebody at the appropriate time. If the Commission were to adopt the rules as is, what would the impact be in Indiana, particularly on standardbred racing. going to end up with a lot of short fields? going to end up with trainers leaving this state and go race somewhere else because we've adopted these rules? I'm not asking you to comment. just saying these are considerations that we need to take into account.

DR. BENSON: The other side of that coin is if that high number of your horses are truly on

clenbuterol, then they're using it for more than the expectorant effects. So the things that they've found, the true incidence of IAD or RAO, which are the equivalents of human COPD, the true incidence in the horse is very small.

2.3

24

25

For example, I spent this weekend some time with a friend of mine who does hunter jumper barns in Florida. If you look at the hunter jumper world, prescribing clenbuterol is an exception, not the rule. It's becoming too much of a rule in racing.

The corticosteroid regulation was largely driven by the practicing veterinarians. Their main concern about corticosteroids was the injection of corticosteroids intra-articularly was being driven by the entry box. So in other words, you entered your race and then you inject the horse, which is usually three to four days before the race goes, which means that horse will not work, you will not have time to evaluate the effects of that treatment. The corticosteroids last intra-articularly particularly long. In fact, longer in many cases than we can regulate them through these thresholds. They can last and persist in the joint for a lot longer than we can

test for them in the blood.

2.3

I don't blame a trainer for not wanting to start pulling joint fluid from their horses to test. I don't think that would be appropriate. These regulations were based on the most recent science. They were considered with a number of practitioners in the room as well as regulators. Really the practitioners wanted the opportunity to see a horse work or train, as they do in standardbreds, prior to entering a race and running in company.

We're actually looking at adding one more corticosteroid this month. It will be isoflupredone. Some of the practitioners wanted a different corticosteroid that they can use a little bit differently. They use it in sore high suspensory ligaments. We're planning on adding that one this month.

I think ultimately the issue here is these have been very well vetted, they're very well considered. If I were to think about the number of people who have talked about this or debated it, it's been quite a few. I know that we provided a list of references for research articles that reference the research for each of these

medications that we in part rely on in one way or another.

1

19

20

21

22

2.3

24

25

I also last week -- and I'm hoping that Joe got these to you -- provided some graphs of summary data for those unpublished articles. There are a few articles that are unpublished, and because of the way the scientific advisory committee works, we have a confidentiality agreement. When I started at RMTC, there was no confidentiality agreement, and researchers were hesitant to share their information. We also had a body of work in Europe that we couldn't use because that was subject to a confidentiality agreement. So one of the first things I did, the lawyer and me made everyone sign a confidentiality agreement; and if they didn't, they didn't remain on the scientific advisory committee.

In order to give some information, we've tried to in every case provide summaries of the data or information regarding what the decision was based upon. So I forwarded a summary of information for acepromazine, and it's the same summary that our board saw. So that will give you an idea of what decision was made, and then that's the same for betamethasone. Also I forwarded one for firocoxib,

but there is an article that's currently out that should help.

2.3

So I think that the important thing is that we've done a lot of work. We've spent a lot of the industry's money on this. We are nonprofit. We are funded by the stakeholders in this industry, the tracks and the groups who have an interest in this game. Horsemen's associations are actually quite big funders of ours. They have all looked at this. While I will tell you not everyone is happy with everything, they all realize that it's more important to compromise and get to uniformity than it is to have everything the way that each individual would want it and continue on.

I can tell you as I went to Kentucky, they're unhappy that I raised some of the thresholds and shortened some of the withdrawal times, and then the horsemen on the other side are upset. It's really all about compromising, moving the whole sport together forward for the better.

Now with that long list of medications that's probably put you to sleep, I'm going to give you a brief update on the multiple medication violation penalty system. The whole purpose of this was to address the small number of repeat violators. It's

a very small percentage of trainers responsible for a high number of positives. For those of you who follow racing at all, Rick Dutrow is the poster boy for this. Whether right or wrong, he basically is now serving a ten-year suspension because he had so many medication violations that went unchecked for so long, and he is constantly the individual that the industry and the public points to as why we need to clean up racing.

2.3

The way that this works is it's very simply a point system, very similar to a driver's license system. The number of points are based on the seriousness of the medication involved. The more serious, the more points. As you collect points and have more than one violation, there are different levels of penalties that are involved.

The only penalty that this covers is a suspension. It does not interfere with the discretion of the stewards. They have all the discretion on the underlying penalty. They can have suspension, fine, revocation of purse. But the suspension of this runs consecutively, not along with the other suspensions. So, for example, if the stewards hand down a thirty-day penalty and there's a three-point violation, they now have a

sixty-day suspension.

2.3

I can tell you very few trainers actually fall into this. Everyone started at zero on January 1. When I went back and looked at the databases on the trainers, even some of the biggest trainers in the country would never have run into a problem. It has nothing to do with size of stable; it has to do with management of stable. The number of individuals who would violate this, I actually had to get suggestions on where to look. I actually had to go back to my own history working at Canterbury Park to know a few trainers who were a little bit more liberal with the medication rules.

The only other big point of this is points for the less serious violations, your bamines, can be expunged after a set period of time. So, again, it's very much like a license program where the points go on, you serve the suspension if you have more than one violation and more than the set number of points in a set time, and then the points can fall off. Where the points do not fall off for the purposes of multiple medication violations are the most serious violations, the EPOs, the dermorphins, those kinds of drugs that have no business getting into a horse and don't

accidentally get into a horse.

Those are the cases where we don't want these to fall off. Oftentimes people say that seems very punitive, but everyone starts at zero. So they're on notice that if they do it and get caught that they're running the risk with their license.

So that is all I had, unless you have any other questions.

CHAIRMAN DIENER: I'm sorry. I just want to mention for the other Commissioners here, our own rules on things other than medications largely adopt the model rules of RCI, separate and apart from the drug thing, the medication thresholds or penalties. We generally, our rule book, mimics RCI's rules. There's going to be some variances, but this is not just a single little isolated thing. We're with RCI on just about every rule that we've ever adopted.

I'm sorry. George?

COMMISSIONER PILLOW: Just out of curiosity.

Did the Kentucky commissioners vote on this?

DR. BENSON: Yes, they have. It is in the process of adoption. I believe it is out for comment period, and they anticipate that it will be in place in mid-May to early June. Illinois also

did, and they approved it.

2.3

COMMISSIONER PILLOW: I think Joe said 17 states have adopted this.

DR. BENSON: Have adopted the therapeutic medication schedule, or they're in process.

Actually, if you look at the ones that are in process or adopting, have adopted, or are discussing it, it turns out to be some 80 percent.

CHAIRMAN DIENER: Some states have different procedures where you can approve medication and then you have to go through a rule-making process and receive comments.

COMMISSIONER PILLOW: Okay.

DR. BENSON: They're all in a little bit different position because of that.

COMMISSIONER WEATHERWAX: So has Illinois adopted these rules or are they in the process?

DR. BENSON: Their Commission has approved it, and then I believe they have to go out to a comment period or a rule-making period. They adopted it, I want to say, in November. That's with regards to the therapeutic medication schedule, the third-party administration of Lasix, and the lab accreditation. You don't have to worry about lab accreditation because you already have supervised

administration and the laboratory is already accredited.

2.3

COMMISSIONER WEATHERWAX: Is clenbuterol now allowed in our state?

DR. BENSON: Yeah, it is. I believe you have a 96-hour withdrawal time, five days.

COMMISSIONER WEATHERWAX: But is it true, then, that the albuterol is going to be a substitute for that in the future?

DR. BENSON: It will be an addition to this list, I believe. I don't think we need to take clenbuterol off the list, because if a horse is taking a couple of weeks off, it's not a bad medication by any means. It's very easy to use to treat. Albuterol is certainly more effort to treat, because you have to treat four times a day versus twice a day orally. So for that option I think it's okay to leave on the list and leave in the arsenal of the vet, but I think that they would complement one another well.

COMMISSIONER WEATHERWAX: So evidently the clenbuterol does a good thing on the medication side, but the bad thing is the steroids?

DR. BENSON: Right.

COMMISSIONER WEATHERWAX: So if you use too

much, you create a false steroid effect.

2.3

DR. BENSON: Unfortunately it's not even using too much. You can use the absolute low recommended dose and within six days see an anabolic effect.

So if it were that easy, it would be a little bit maybe easier to control; but even with the therapeutic dose, low end, you get the effect.

COMMISSIONER SCHENKEL: Maybe it'll come up in the Chairman's reference to talking about impact and so forth in Indiana. Give me an idea of timing of all this. If there are varying states doing this and they're in different stages, what is our time frame? Do we have some sort of deadline or ideal timeliness of this?

CHAIRMAN DIENER: No. We make up our decisions when we make up our decisions.

COMMISSIONER SCHENKEL: Nobody's ever talked about that, so I'm just kind of curious about that.

MR. GORAJEC: I'm not going to make a comment that's contrary to the comment the Chairman just made. I think it makes all the sense in the world to start these rules now, which is the beginning of our race meet. These rules could have been put forth to the Commission back in September or October. We chose to get as much comment as

possible. As you can see by what was filed in your packet that we've gone out of our way on more than one occasion to go to the stakeholders in our state and solicit their input, and we've been doing that for guite some time.

We have a race meet starting at the end of this month. We have thoroughbred starting at the beginning of May. Ideally these regulations would be in place and enforced in time for the beginning of the race meet.

One of the things I'd like to bring up. In your packet I provided a letter from the NTRA.

It's behind this buffer brown-colored piece of paper (indicating).

COMMISSIONER PILLOW: What section is that?

MR. GORAJEC: It's under Tab 2, down maybe halfway through.

CHAIRMAN DIENER: Letter from Mr. Waldrop.

MR. GORAJEC: Yes, from Alex Waldrop. That letter in some way really got the ball rolling, because it's an official request that the Commission received for consideration of these rules.

What's interesting is that attached to the letter is a list of signatories, of different

groups that are asking the Commission to pass this, or at least say that they support these regulations. When you look through that list, with a few conspicuous exceptions, almost every major racing-related association is listed. You have racetracks like Churchill Downs and their family of tracks. You have Stronach Group and their family of tracks. You have Penn National and their family of tracks. You have national racing-related associations. You have the American Quarter Horse Association has signed off on this. Of course, you have the RMTC.

2.3

Intermixed in this list are a number of horsemen's associations. The reason I bring this up is that we have two letters in our packets, one from the HBPA and one from the ISA, voicing concerns with regard to the proposed rules and regulations, but I think I would be remiss if I didn't bring up to the Commission that horsemen around the country, okay, not all of them are against these medication rules. I'm just reading -- I've highlighted a handful of horsemen-related associations that have signed off on these rules -- the California Thoroughbred Breeders Association, the Florida Thoroughbred

Breeders and Owners Association, the
Kentucky Thoroughbred Association, the New York
Thoroughbred Association, the Thoroughbred Owners
and Breeders Association, the Thoroughbred Owners
of California. And I think most importantly the
Thoroughbred Horsemen's Association, which along
with the HBPA is a national group of horsemen.
They don't represent horsemen in just one state;
they represent horsemen in multiple states.

2.3

Maybe if I can ask Dionne. With regard to that particular association, because I see they represent horsemen in Delaware, Illinois, Maryland, New Jersey, New York, and Pennsylvania, did they participate in the process? And can you share with the Commission their thoughts on this particular list of medications?

DR. BENSON: Sure, absolutely. The meeting that I talked to you about in Baltimore was chaired my Alan Foreman, their executive director. He's the national organization's executive director. He also was the chair of the penalty committee that wrote the multiple medication violations penalty. Horsemen have been intricately integrated in this process.

I think that to a certain extent, it will

benefit them greatly. I mean, there will be strict rules, but they will all have the same rules. These thresholds that we've given are ones that we know can be enforced in the laboratory. We've gotten rid of any of the false thresholds. In the new research we're getting rid of any false thresholds, where if there was a withdrawal guideline of four days and really we could only find it for two and a half days. We're eliminating

those issues. We're trying to be as open as

Really that way in my mind it tells all the horsemen they are in the same position. Just because maybe the guy next to you may be willing to ask his vet to do something closer or may be willing to try something closer, that can't happen as easily anymore because of these rules.

CHAIRMAN DIENER: The main holdout amongst the horsemen associations is the United States Trotting Association, the association representing the standardbreds.

DR. BENSON: Correct.

possible about that.

CHAIRMAN DIENER: That related principally, if not solely, on clenbuterol and steroids.

DR. BENSON: Correct, the corticosteroids and

2.3

clenbuterol. Although I will say that they are planning on attending our next meeting and making another presentation. They actually withdrew from the RMTC and took significant amount of funding away from us. Whether they decide to return or are asked to return to the RMTC, that could still happen. I don't think that door is shut by any means. By the same token, just because they gave up their seat at the table, it does not mean we don't consider all breeds.

CHAIRMAN DIENER: Anything else?

22

2.3

24

25

The only other thing I would MR. GORAJEC: add, and this is to the standardbred issue. The RCI is in the process of doing a survey of their member jurisdictions with regard to the status on these particular rules, and they asked a question with regard to whether racing commissions were inclined to have separate medication rules for standardbreds versus thoroughbreds. And of the, I believe there were, 16 responses -- 16 different commissions responded to that survey that have standardbred racing -- and only 3 of the 16 said that they are considering or likely to have separate rules. The other 13 said that the rules for thoroughbreds and quarter horses will be the

same for standardbreds. And the three jurisdictions that indicated that they were looking at different rules were New York, Pennsylvania, and Ohio.

DR. BENSON: And Delaware may end up in that. They lost their executive director, so I don't think that they know what's going on yet.

CHAIRMAN DIENER: Thank you.

DR. BENSON: Thank you.

2.3

CHAIRMAN DIENER: We're going to take a break in just a couple minutes. When we get back, I want the Commission to have a chance to reflect on where I'm vetted on this.

The model rules that were sent out were exactly as passed by RCI. Those are the ones that have been sent out and made available for comment to date from the stakeholders here in Indiana. The proposed rules the Commission would adopt have the same identical threshold levels in them as the model rules, but we did not include pre-race treatment times for each medication in our proposed rules. Those are in the model rules.

Because of that slight variation, it's going to be at least my proposal -- and think about it over the quick ten-, fifteen-minute break -- we

adopt the threshold levels to get this thing going with our racing starting March 28, but we will allow supplemental comments from all stakeholders by a time certain -- let's call it April the 7th -- and we will formally adopt the emergency rules at our next Commission meeting scheduled for the latter part of April.

2.3

That's what I would think, and you can mull that over. I personally feel like a nitpicky lawyer, since we changed something that we didn't send out for comment, allow some supplemental comments.

When we also come back from our break, I'd like to hear if the track has any thoughts about impact on fields or owners leaving the state or that kind of thing in Indiana.

Let's take a break. 11:00, we'll reconvene.

(A brief recess was taken.)

CHAIRMAN DIENER: Commission meeting has been reconvened.

Just a quick comment, if you have any comments, from Hoosier Park, Indiana Downs, Centaur Gaming whether if the Commission were to adopt the RCI model rules what would be the impact on horse racing at Anderson, or maybe even

Shelbyville, but primarily standardbreds? Would you end up with a bunch of short fields? Would some of your favorite trainers be shipping out to more friendly states? I just don't know. Maybe I'm just making up questions that there are problems that don't even exist. I don't know. You have any thoughts, Mr. Elmore?

2.3

MR. ELMORE: Just a few, Mr. Chairman. I got more questions than solutions, as always.

Brian Elmore, vice president of racing, Centaur.

I think I'm 90 percent in favor of this. I understand the penalty process. It functions like the Bureau of Motor Vehicles. Start out at zero, get speeding ticket, you accumulate. After so many times, you go back to zero or you lose your license. I understand that. I like that. I worry about false positives, and I want to have a little more clarification on that, or better understanding for me, because that can create a lot of issues.

The key to me operation as far as the racetracks is the communication of these rules. That is going to be absolutely key, that not only all the Indiana trainers and practicing veterinarians but all those in the Midwest that also ship horses in here to race know these.

If we get in a situation where it's not properly communicated, there could be a significant number of positives, which ties up an awful lot of these ladies' time, and the judges and stewards, as well as purse redistributions. Sometimes it's very hard to get money back out of an owner who has been paid the winning purse and then you find out that his purse has been taken away from him and you spend that time redistributing that to the rest of the participants in the race.

2.3

I think the bottom line on this will be those trainers and veterinarians who might think about improperly medicating might reconsider and those trainers and veterinarians who choose to improperly medicate will probably not stay in Indiana very long. Thank you.

CHAIRMAN DIENER: Thank you, Mr. Elmore.

This issue is not closed. I probably misstated what I'm suggesting the Commission to consider this morning. Because the proposed emergency rules in front of us today are not identical to the rules that were submitted for comment to the industry here in Indiana -- specifically, pre-race treatment times are not in the proposed rules before the Commission -- that

two things: One, the Commission consider setting a date of April the 7th for any supplemental comments from industry stakeholders, veterinarians, whatever, on the proposed rules being considered by this Commission for adoption. Two, the proposed rules that are in front of the Commission right now would be acted upon one way or the other after receipt of those comments at our next Commission meeting, which is scheduled for sometime in late April.

2.3

What that means would be that when harness racing starts on March 28, the threshold levels in the current Commission rules would still be in effect until the Commission changes those, if it chooses to do so, at its next meeting when it considers these new emergency rules. Is that too fuzzy for the Commissioners to consider?

COMMISSIONER SCHENKEL: No. I understand what you're suggesting. I guess I'd ask if there's comment about what does that do to maybe Mr. Elmore or somebody again. Does that further confuse things?

MR. ELMORE: No, sir. It actually is helpful.

COMMISSIONER SCHENKEL: That's my . . .

CHAIRMAN DIENER: Does that make sense?

COMMISSIONER PILLOW: That makes sense.

CHAIRMAN DIENER: Joe, comment?

2.3

MR. GORAJEC: I'm comfortable with everything you've just laid out.

I would add one thing, and the one thing I would add is we only have threshold levels in our current rules on a few drugs, our nonsteroidal anti-inflammatories, Salex, and a few others. As you said, they're not going to change. What we do every year is we give the horsemen and the veterinarians guidance with regard to withdrawal times. This is something that the Commission has never taken action on. This is something that's driven by staff in working with the lab.

What I would propose and what I would do, unless the Commission instructs me otherwise, is the guidance that we give the veterinarians and the horsemen leading up to the next meeting with regard to withdrawal times would be consistent with the current RMTC proposal. What we do is we work with the lab and based upon the best available science we give horsemen guidance on withdrawal times. That doesn't change.

Quite frankly, in my mind the best available science is what the RMTC has proposed and the RCI

has approved. So with regard to the guidance on all these other drugs, the guidance that we would give is going to be consistent with what is currently in front of the Commission.

CHAIRMAN DIENER: Question, Greg?

COMMISSIONER SCHENKEL: Is that basically saying we're adopting them, sort of?

2.3

MR. GORAJEC: Well, for example, let's take the one that's probably getting the most discussion. That's clenbuterol, okay. Clenbuterol right now is five days out. We've just heard testimony, okay, that five days out the horse is going to have an anabolic effect when it races. That's something that we should not want in Indiana, horses racing with the effects of anabolic steroids in their system.

The recommendation that's been proposed by the RMTC has a withdrawal time of fourteen days. So what I'd be saying right now is that the guidance that we would give the horsemen, okay, would be consistent with what is proposed by the RMTC. If we don't do that, then basically what we're saying is that we're knowingly allowing horses in our jurisdiction to race with the anabolic effect of clenbuterol in their system, and I don't think

1 that's something that we want to do. CHAIRMAN DIENER: Does that answer your 2 3 question? COMMISSIONER SCHENKEL: Sort of, I quess. 4 CHAIRMAN DIENER: See, we don't have 5 withdrawal times in our rules and regulations. 6 7 MS. ELLINGWOOD: Maybe to help clarify what 8 Joe is saying. With respect to the guidance, it's 9 just a best practices recommendation. horsemen didn't follow the guidelines and they 10 didn't violate the rule, that's not a rule 11 violation. Failing to follow the recommendations 12 or the guidelines isn't a rule violation. 13 COMMISSIONER SCHENKEL: It's a suggestion. 14 15 MS. ELLINGWOOD: Exactly. COMMISSIONER SCHENKEL: Okay. 16 CHAIRMAN DIENER: But if you violate the old 17 rules threshold levels, yes, then you get a 18 violation. 19 20 COMMISSIONER SCHENKEL: Thank you. 21 CHAIRMAN DIENER: Is that clear on what we're 22 proposing? 2.3 COMMISSIONER WEATHERWAX: Let me try and put 24 it in what I understand what you're doing. I agree with you, Mr. Chairman, that this is a smart move 25

to move this to next month, so we get input, critiquing. What Joe's saying if you don't get some of these guidelines to people before the season starts, we're going to be back here again with the same questions at the end of April. I guess what you're saying is a heads up?

2.3

MR. GORAJEC: The race meet's starting when it's starting. No one's suggesting because we haven't approved the rules that we're going to push our race meets back. We're going to have racing at the end of March, and we're going to need to give the horsemen guidance on what the withdrawal times should be for certain drugs.

What I'm saying is that we've always done that on basically the best science available after discussion between myself, our equine medical director, and the laboratory, okay. Quite frankly, unless someone can convince me otherwise, the best available science is what the RMTC has in front of us.

COMMISSIONER PILLOW: Mr. Chairman, is there anyone here that can speak on behalf of the horsemen for five minutes? I don't want to prolong the meeting. I don't know if you want to do that or not. I'd like to just hear more, five minutes'

worth.

2.3

CHAIRMAN DIENER: Well, the substantive comments from the horsemen, we're going to get to hear that when we vote on the new threshold levels.

COMMISSIONER PILLOW: At the next meeting?

CHAIRMAN DIENER: At the next meeting.

COMMISSIONER PILLOW: Okay. That's fine.

CHAIRMAN DIENER: So I made a motion. If it's obscure, I'll try to restate it. It was never seconded.

COMMISSIONER SCHAEFER: I'll second it.

CHAIRMAN DIENER: Let me try to restate it.

The Commission will be receiving on or before April 7 any supplemental or additional comments from the industry, any stakeholders, what have you, on the proposed emergency rules to be considered by the Commission which adopt the threshold levels for the 24 medications listed by RCI and the penalty point system for multiple violations by trainers. That will be considered at the next Commission meeting. In the interim, until that time, the current threshold levels in the Commission's current rules will remain in effect and force until changed by the Commission.

COMMISSIONER SCHAEFER: Is that your motion?

1 CHAIRMAN DIENER: That's what I'm trying to restate so it's clearer, I quess. 2 COMMISSIONER SCHAEFER: I second that. 3 CHAIRMAN DIENER: Discussion? 4 All in favor. 5 THE COMMISSION: 6 "Aye". 7 CHAIRMAN DIENER: Thank you. 8 No. 3, settlement agreement between 9 United Tote and commission staff. I don't know who's handling this. 10 Lea? Holly? 11 MS. ELLINGWOOD: Holly's up. Thank you. The settlement 12 MS. NEWELL: agreement between the IHRC and United Tote relates 13 to a licensing issue that came to light last fall. 14 15 United Tote provides tote services at Hoosier Park. Pursuant to IHRC rules, all employees of 16 United Tote, or any track vendor, must be licensed 17 18 by us, the Horse Racing Commission. individuals worked for United Tote at Hoosier Park 19 20 in 2013 without an IHRC license. 21 The Commission discovered this in October and 22 immediately acted to make sure all those employees 2.3 were licensed. However, United Tote was in violation of our rule that prohibits the harboring 24 25 of unlicensed help. Commission staff filed a

complaint against United Tote, and we were able to reach a settlement, which is contained in your materials. United Tote has agreed to pay a \$7,500 fine to resolve the issue.

We request that the Commission approve the settlement as presented.

CHAIRMAN DIENER: Questions, comments from the Commission?

All in favor.

THE COMMISSION: "Aye".

CHAIRMAN DIENER: Dissenting, same sign.

(No response)

2.3

CHAIRMAN DIENER: Hearing none, it is approved.

I will tell you, personal matter. I view the unlicensed employees of United Tote being at a track in restricted areas unexcusable, and I would not approve anything such as this in the future. I think there's just no excuse to have an unlicensed tote employee in restricted areas at either track. United Tote has been around a while. They know how to do this. This is, I hope, the last we receive of something like this.

I'm sorry. Go ahead.

That's approved. We're back to No. 4, which

is Miss Newell again, ruling logs.

MS. NEWELL: Yes. You have the small number of rulings that have been issued in the off season. To the extent you have any questions, I can address them at this time.

CHAIRMAN DIENER: Few rulings when there's no live racing. Any questions from the Commission?

(No response)

CHAIRMAN DIENER: Hearing none, thank you for the report.

No. 5, approval of split sample laboratories for this year and beyond. Mr. Gorajec?

MR. GORAJEC: Yes. As I had mentioned earlier, we do have a new primary testing laboratory. Dr. Sams and HFL last year was a split sample laboratory, so the change in the primary laboratory has caused us to change our menu for split sample labs. We have two. Both are ISO 17025 accredited, and I recommend to the Commission that they approve these two labs for split samples.

CHAIRMAN DIENER: Just as a matter of information. What does ISO accredited mean? Is that a trade association that accredits?

MR. GORAJEC: That's a company that accredits,

like, almost everything under the sun, probably including some things that Steve Schaefer and his company use.

CHAIRMAN DIENER: Okay.

2.3

COMMISSIONER WEATHERWAX: It's tough.

COMMISSIONER SCHAEFER: I've been through it.

CHAIRMAN DIENER: Mr. Hartman, do you have a comment?

MR. HARTMAN: Jim Hartman, Indiana Breeder & Owner Protection.

Just a quick question. Obviously there's been a different selection for the primary lab here, and I noticed that Truesdell is not on the list of split sample. Now, I also noticed in the regulations that not only does the Commission approve the split company but also the primary lab does too. So has that approval taken place? Or is there a particular reason why Truesdell wouldn't be on the list, given the great work that they've done for the Racing Commission over the years?

MR. GORAJEC: Well, there's a lot of labs that are ISO 17025 accredited, and there's really no reason that Truesdell's not on the list other than we chose not to put them on the list.

MR. HARTMAN: Okay. So then these two have

been approved by the primary lab, then, as well?

Or is that contract not in place yet?

2.3

MR. GORAJEC: The contract's not in place, but we've talked to the primary lab who will have the contract to make sure that they're comfortable with the split sample laboratories that are before the Commission, because we wouldn't put them before the Commission unless the primary lab was comfortable with them.

So the answer to your question is yes.

MR. HARTMAN: Okay. Thank you.

CHAIRMAN DIENER: Item No. 6 is approval of labs for out-of-competition testing for this year and thereafter. Joe, again, that's talking about HFL here?

MR. GORAJEC: The reason that we have two separate lists is that when you're looking at certain types of drugs that are tested for out-of-competition, the epogens, agents, not all laboratories are experienced in testing for those drugs. Fortunately for us, HFL is able to both do the primary screening and the confirmation, so they will be our primary testing lab for the out-of-competition testing samples.

For the split labs we have two others. One of

them is UC Davis, which the Commission's familiar 1 with with regard to the previous split samples. 2 The other laboratory is University of Pennsylvania, 3 which is the lab that actually invented or 4 discovered the methodology for testing EPO. 5 So we basically have as our split laboratories 6 7 for EPO and EPO-type drugs, the two most common laboratories that are for split sample testing. 8 9 CHAIRMAN DIENER: Any questions, comments? 10 (No response) 11 CHAIRMAN DIENER: Dr. Sams, do you have 12 anything to add to this? 13 DR. SAMS: I'm sorry. CHAIRMAN DIENER: That's all right. 14 15 have anything to add to the approval of your lab? 16 DR. SAMS: No, thank you. CHAIRMAN DIENER: All right. Thank you. 17 18 Motion to approve the out-of-competition testing labs. 19 20 COMMISSIONER SCHENKEL: Second. 21 CHAIRMAN DIENER: All in favor. 22 THE COMMISSION: "Aye". 2.3 CHAIRMAN DIENER: Opposed, same sign. 24 (No response)

No. 7, a waiver of a rule on

CHAIRMAN DIENER:

25

eligibility. Mr. Gorajec?

2.3

MR. GORAJEC: This is an issue that has come up to the Commission in the past, and it's coming up again, in that I'm giving the Commission notification that I'm actually waiving a rule, which is in my purview. The rule stated in the agenda is 71 IAC 5.5-3-1(h). It's really the rule below that (i), and it has to do with our continuing education.

When we started this program, one of the pillars of the program was going to be a fallback position for those who haven't attended a live seminar to be able to get their credit online.

We've been anxiously awaiting some progress from the California Horse Racing Board and UC Davis, who are designing modules for continuing education. We had hoped that they would be available last year; they were not. Last year at this time we were hoping they'd be available this year, and they're not.

I just don't feel comfortable requiring to be enforced until such time as the online component is available. So what I am doing -- and the reason I'm doing it now rather than suspending out the memo -- I wanted to do it in the most public forum

so that the Commission and the public audience know that this particular year, that requirement about continuing education is going to be waived.

CHAIRMAN DIENER: Question.

2.3

COMMISSIONER WEATHERWAX: Is this for you and all the staff?

MR. GORAJEC: No. This is the education of trainers.

COMMISSIONER WEATHERWAX: It doesn't exist right now, so it can't even be a qualification. You're not able to qualify because you can't even get the training.

MR. GORAJEC: We've had over the past few years a number of live seminars at the track for trainers.

COMMISSIONER WEATHERWAX: Okay.

MR. GORAJEC: Quite frankly, the turnout has been extremely well. The trainers who have received their continuing education represent approximately 80 percent of the horses that race at the track. The issue, though, is primarily horses shipping in from out of state. Those trainers are unlikely or less likely to attend a seminar in Indiana, especially when they train out of state, and as that fallback provision that I feel is so

important to allow them to go online rather than come to Indiana to get the accreditation.

Basically for two years in a row we've been disappointed that that online component's not available. I've seen some of the work that the California Horse Racing Board has done along with UC Davis, and it's excellent, very good work. It's just not finished and it's just not available.

COMMISSIONER WEATHERWAX: Okay.

COMMISSIONER SCHAEFER: This is the online version you were trying to get two or three years ago; right?

MR. GORAJEC: At least two years ago.

CHAIRMAN DIENER: Further questions, concerns?

(No response)

2.3

CHAIRMAN DIENER: All in favor of granting the waiver of this particular rule for 2014, please say aye.

THE COMMISSION: "Aye".

CHAIRMAN DIENER: Opposed, same sign.

(No response)

CHAIRMAN DIENER: Waiver is granted.

Items 8 and 9 are petitions for repeals of rules by the Indiana Breeder & Owner Protection, Inc. The petitions are what they are.

Mr. Hartman, why don't you come on up. What I propose to do, just to shorten things up, because I think I understand where you're coming from, is see what Ms. Ellingwood thinks, give you a chance to respond that, if that's satisfactory.

MR. HARTMAN: Sure.

2.3

CHAIRMAN DIENER: Go ahead, Ms. Ellingwood, on No. 8.

MS. ELLINGWOOD: As you can see from the material in your packet, IBOP has submitted a petition recommending that the Commission repeal 71 IAC 10-3-20(b). Again, you can see is a rule in which the Commission has delegated to the executive director the authority to draft an administrative complaint.

I don't want to put words in Mr. Hartman's mouth, but what I've taken from the petition is that IBOP identifies two statutes which changed as a result of Senate Enrolled Act 609, which was effective January 1 of this year. That legislation removed certain language from the statutes, which had the effect of prohibiting the executive director from doing certain things. Specifically, the executive director is not allowed to impose sanctions upon a licensee or to deny, suspend, or

revoke a permit or license.

1

2

3

14

15

16

17

18

19

20

21

22

2.3

24

25

The rule that IBOP has asked to be repealed delegates, again, to the executive director the ability to draft an administrative complaint. The basis of the request is that basically Joe can no longer do that. IBOP fails to understand, though, that drafting an administrative complaint does not constitute the end position of a sanction, nor does it constitute the revocation, denial, or suspension of a license.

Essentially an administrative complaint is just a document that begins the disciplinary It's simply notice to a licensee that process. disciplinary process is going to begin and identifies the recommendation that the executive director makes with respect to a penalty. words, the executive director is simply making a recommendation to the Commission with respect to the penalty that he believes, based on his years of experience in the industry, you as the Commission should impose on the licensee. Those people who are able to impose a sanction or who are able to deny, revoke, or suspend a license are those identified in statute, and those are the judges and stewards and the Commission itself.

So staff would recommend against granting this petition because we do not believe that the rule that has been identified is contrary to the change in the statute. Furthermore, if that change is made, the Commission itself would be responsible for drafting its own at administrative complaints, which would be both practically and procedurally difficult.

CHAIRMAN DIENER: Mr. Hartman?

2.3

MR. HARTMAN: One of the goals of this petition was to get on record exactly what the position was on this, so we've accomplished that.

The only thing that I would say is that an administrative complaint of this manner can be sent to a person and a person says I accept that penalty, so it doesn't necessarily go each and every time to the Commission for review. So that's essentially handing down a penalty.

MS. ELLINGWOOD: When the Commission staff drafts the administrative complaint and sends it to a licensee, many times the licensee then engages in settlement negotiations. I think that's what Mr. Hartman's referring to. In that case every time we have an administrative complaint where it results in a settlement agreement, that settlement

agreement comes before the Commission for approval. 1 Or if it's small enough penalty, the judges and the 2 stewards will consider. 3 So every time the end position of sanction, a 4 5 denial, suspension, or revocation of license, every time is considered by the Commission or an entity 6 7 that is being given authority by the statute. COMMISSIONER SCHENKEL: And not staff. 8 9 MR. HARTMAN: So what you're saying is it's 10 only a recommendation in any case? 11 MS. ELLINGWOOD: Absolutely. 12 MR. HARTMAN: Okay. Thank you very much. COMMISSIONER PILLOW: How often does 13 administrative complaints occur? 14 15 MS. ELLINGWOOD: I'd have to check the log, but I think in 2013 we issued maybe, I want to say, 16 between five and ten administrative complaints. 17 18 COMMISSIONER PILLOW: So it's not a huge number? 19 20 No, it's not. Again, every MS. ELLINGWOOD: 21 time we initiate that process, in one way or 22 another, whether that ends by settlement agreement 2.3 or by a proposed final order, it always comes 24 before the Commission.

Point in fact. With respect to the Adams case

25

which the Commission heard last year, which you were not a part of the Commission at that time, the executive director recommended a proposed penalty and the Commission changed that penalty, as evidence that the Commission itself is the entity that has the authority to impose a sanction.

COMMISSIONER PILLOW: Okay.

CHAIRMAN DIENER: So I would go ahead and make the a motion that we deny the petition to repeal 71 IAC 10-3-20(b).

COMMISSIONER SCHAEFER: Second.

CHAIRMAN DIENER: All in favor.

THE COMMISSION: "Aye".

14 CHAIRMAN DIENER: All opposed, same sign.

(No response)

2.3

16 CHAIRMAN DIENER: Hearing nothing . . .

No. 9, Mr. Hartman again. Again, requests a repeal of a rule because it kind of duplicates what's in the statute is what I gather.

MS. ELLINGWOOD: I'm under the same impression too. The petition requests the Commission repeal specifically 71 IAC 1.5-1-40, which is the definition of Foreign Substance. The basis of the request appears to be Indiana statute which provides in pertinent part that to the extent

possible a rule adopted by an agency shall avoid duplicating standards found in state or federal law. IBOP specifically mentions that the same definition of foreign substance is also included in the Indiana statute.

2.3

First, the statute that IBOP cites is one that is generally considered by agencies at the time the agency's adopting an administrative rule, which is not happening here. This rule was actually re-adopted by the Commission, and I don't believe we received any comments at that time.

Second, the statute that IBOP has listed, which discourages agencies from duplicating standards, is in my mind inapplicable, as what you find in the rule is not a duplication of standards. It's a duplication of definitions. There's a difference between standard and definition. A standard is generally a level of quality used as the norm. The definition is just a statement as to the meaning of the word. So in my opinion, that basis for repealing this rule doesn't apply.

Notwithstanding those points, though, staff believes that keeping the definition where it is in the rule -- and little bit let the executive director expound on this if he wants to -- in my

mind it can be helpful to regulate an entity when they're trying to look to find these definitions. In other words, you don't have to go to multiple locations to find it. It's all in the rule. As a matter of fact, there are at least eight other places where we have a definition in our rule that mirrors the definition in the statute.

1

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

2.3

24

25

So I recommend that the Commission deny this petition as well, or maybe the alternative allow the industry the opportunity to comment as to whether or not having this definition in the rule assists them.

CHAIRMAN DIENER: I guess I have a practical I know there are licensees -concern about this. and I'm primarily talking about the people on the backside -- that are charged with being responsible for compliance with and familiarity with our rules and regulations. I don't see as a practical matter they're expected to also be carrying around in their back pocket a copy of the pari-mutuel I just think no harm, no foul. I think statute. it's easier for those in the licensed area that they're charged to be familiar with our rules and regulations, that's it. They're not charged with familiarity with our statute.

Executive director on Lea's comments?

2.3

MR. GORAJEC: If the Commission approved the petition, the change wouldn't impact Commission staff, but just piggybacking on what you just said. I mean, take this particular definition,
Foreign Substance. In our rule book Chapter 8 deals with medication, and the definition of
Foreign Substances kind of is the building block on our entire chapter. A lot of horsemen, even though they're required to know the rules, a lot of them don't go to our rule book. Having said that, I don't think any of them go to our statute.

So to the extent that you can get a horseman to go to the rule book to know what our rules and regulations are, I would think that to the extent that we have important definitions in our rules would be a plus. I would assume that the horsemen would prefer that and appreciate that.

Like I said, it doesn't make a difference to the Commission staff. I'm just thinking that, you know, to the extent there are important definitions, if they're in our rule book, I think that's a good thing.

CHAIRMAN DIENER: Mr. Hartman, give you a chance.

MR. HARTMAN: Well, I guess there's the distinction between important definitions and all definitions, because there's a number of definitions that are in the statute that don't exist in the Indiana Administrative Code.

2.3

What I would point to on the petition is that, in fact, the Foreign Substance definition in the standardbred rules is expired. It's been allowed to expire. That also ties into the medication rule in the standardbred rule book because it refers directly back to the definition.

So in a way the point is that this rule is expired and the last paragraph here says -- should you believe otherwise, which I'm thinking that's the case -- then an effort should be made to promulgate Foreign Substance definition within the standardbred rule book, because as of today it doesn't exist.

MS. ELLINGWOOD: Mr. Hartman is right that the rule defining Foreign Substance did expire. As you may remember, Commission staff last year was in the process of attempting to renew 900 administrative rules that were scheduled to expire. Frankly, the fact that the definition of foreign substances did get renewed in thoroughbred and not in standardbred

was not by design. To the extent that Commission staff can in the future make that consistent, we certainly will.

To the heart of this request, which is to repeal the definition from thoroughbred, still I would recommend that the Commission not grant this request. Then if we need to move forward with defining Foreign Substance in the standardbred again, we certainly can do that.

CHAIRMAN DIENER: You would go ahead and recommend denying the petition for repeal of the rule, but you're agreeable to submitting a rule to reinstate Foreign Substance definition for standardbreds at our next Commission meeting, something like that?

MS. ELLINGWOOD: Yes, Chairman. My point is simply that I think there is a need for the definition of Foreign Substance in the rule, so this petition should be denied.

COMMISSIONER SCHAEFER: So moved.

CHAIRMAN DIENER: So moved.

MR. HARTMAN: Chairman Diener, then if the definition is not in place until the next meeting, which I think is after the standardbred meet starts, then the medication rule, 8-1-1.5, has no

meaning. It starts out saying, No horse

participating in a race or entered in a race shall

carry in its body any Foreign Substance as defined

in 71 IAC 1.

CHAIRMAN DIENER: Our governing pari-mutuel statutes will trump any rule. We'll have a basis for enforcing that, even if it's not a rule.

MR. HARTMAN: I hope so.

CHAIRMAN DIENER: Don't worry about it.

Any further discussions?

(No response)

CHAIRMAN DIENER: All in favor.

THE COMMISSION: "Aye".

14 CHAIRMAN DIENER: Opposed, same sign.

15 (No response)

16 CHAIRMAN DIENER: Motion carries.

Item No. 10, we're going to have to ask

Jessica Barnes to present her own views but to

pinch hit for Wendy Brown. Wendy has some home

responsibilities, and Ms. Brown did deliver her

remarks to Jessica, which Jessica can either read

or ask the court reporter to enter them in the

record. Good morning.

MS. BARNES: Good morning. I will just go ahead and read Wendy's remarks. They're pretty

short here.

2.3

The Indiana Thoroughbred Breed Development
Advisory Committee asks for your approval of the
2013 Indiana-bred program. I want to thank my
fellow committee members, Paul Tinkle and
Steve Stults. I'd also like to thank Brian Elmore,
Jon Schuster, and Kevin Greely of Indiana Grand;
Christina Lawton, director of ITOBA; and various
others at the Indiana HBPA and director Mike Brown.
They all came to our meetings with useful and
valuable ideas.

The IHRC staff did an excellent job of keeping us informed and within our budget. The depth and breadth of knowledge of the thoroughbred industry shown by these individuals made quick work of our job.

I believe this committee enjoyed great cooperation and communication with breeders, owners, and trainers of Indiana-bred horses. We tried to listen to their concerns and address their issues. We will be partnering with the racetrack and ITOBA to help fund two stallion season stakes during 2014.

It's a new era in Indiana horse racing. The ownership of Indiana Grand by Centaur and the

direction of Rod's management team has been a boom to the Indiana breed development program. To keep each breed at their racetrack will lead to safer racing and greater success for everyone.

2.3

Two things this committee has heard from horsemen is their desire for more opportunities to race their Indiana-breds and Indiana-sired horses. In 2013 we raced 20 more Indiana-bred races than in 2012.

When the Commission approved the new thoroughbred distribution policy last fall, it allowed Indiana Grand more leeway in the purse structure between open races and Indiana-bred races. Indiana Grand has shown their commitment to take Indiana breeders by allotting enough purse money to race Indiana-bred and sired races by \$2,000 above open races for 2014.

Indiana Grand has also agreed to two additional stakes for three-year-old Indiana-sired horses. These stakes races will be contested (inaudible). The committee named the filly division of this new stakes the Swifty Stakes, in honor of the late Don Myers of Swifty Farms and their contribution to the Indiana program. The (inaudible) will be called the Idaho Stakes, a

symbol of Hoosier excellence. It's important to promote excellence. Whenever incentives are provided, people are try.

2.3

Breeding is an important part of Indiana's agribusiness, but the quality thoroughbred makes money for more people here in Indiana. With better handle, more quality races, so management makes more and everyone benefits. Better horses are less likely to become unwanted horses, and I feel that the breed development program has grown a little more each year. This program is fostering better horses and Indiana-breds are winning more in open company than in other states where breeding program has existed.

Wendy notes that she's proud of what Indiana has done for her horsemen and feels that the 2014 breed development program is one more step toward excellence in Indiana thoroughbred breeding.

So I just echo those remarks. The program is laid out in front of you here. This program is put together with the cooperation of all the entities -- the Indiana HBPA, ITOBA, and the racetracks -- and everyone working together to build a unified program that'll work within our budget and work for the thoroughbred industry in

Indiana.

1

2

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

2.3

24

25

Then you'll also see that there are actually two rule changes that are outlined in this proposal. The first has to do with out-of-state breeder's awards. When this rule was originally written, it did not specify Puerto Rico. actually had an Indiana-bred horse race in Puerto Rico. So it was brought to our attention, and the committee felt like that was within North America; and if an Indiana-bred races in Puerto Rico, it should be included and get Indiana-bred breeder's award if it's within the guidelines of breeder's awards. The second is purse supplement in open races, and this makes this language consistent with the language in 71 IAC 13-5-3-2.

So I would ask for the Commission's approval of this program.

CHAIRMAN DIENER: Ouestions? Go ahead.

COMMISSIONER WEATHERWAX: I've never seen the budget before, but is this an increase or is it the same dollars?

MS. BARNES: It is about the same. I mean, it varies because of slots coming in, and we have seen a bit of a decline in slots. So it is a little bit

1 less than the previous years. We're hoping things are going to level out and stay. Basically we sit 2 down each year and what I do is I look at slots 3 from the previous year and then we try and make our 4 5 budget based off of those recommendations, so . . . COMMISSIONER SCHAEFER: Jessica, along with 6 7 Would you next year put the previous budget? 8 I did have last year's budget, but my filing system 9 took me a minute to find it. I did have it from 10 last year. 11 MS. BARNES: That's fine. We can actually 12 show a comparison from year to year. I have those figures and will include them in the future. 13 CHAIRMAN DIENER: Any additional questions? 14 15 (No response) All in favor of approving 16 CHAIRMAN DIENER: the Thoroughbred Breed Development Advisory 17 18 Committee program for this year and the proposed 19 amendments to the rules, to implement that, please 20 say aye. 21 THE COMMISSION: "Aye". 22 CHAIRMAN DIENER: Opposed, same sign. 2.3 (No response) 24 CHAIRMAN DIENER: It's approved.

I got to ask a question, Brian, just to clear

25

it up. Is there anything to prohibit having a graded stakes race or a restricted race?

MR. ELMORE: Yes, I believe there is.

CHAIRMAN DIENER: That's what I thought, but I wasn't sure. I'm sorry. That just occurred to me.

MS. ELLINGWOOD: Chairman, before we go on, I just wanted to make it clear. With respect to the rules that were adopted, I assume that this qualifies as an emergency rule because there's a timeliness issue with respect to this for the fact that this is for the upcoming season, but I don't want to speak for Ms. Barnes. Can you confirm that that is the case?

MS. BARNES: Yes.

2.3

MS. ELLINGWOOD: This is before the Commission as an emergency rule.

CHAIRMAN DIENER: As long as it complies with the emergency rule guidelines. I believe it does.

And Mike isn't here, so you're on your own for Quarter Horse Breed Development Advisory Committee.

MS. BARNES: Yes. Our chairman, Mike Gross, could not be hire today, so he asked me to make this presentation. Even though his presentation says quarter horse breed development, it's really a document that comes out because of the efforts of a

lot of entities. The Quarter Horse Racing
Association, the management and staff of
Indiana Grand all worked together to make this
program work.

2.3

The quarter horse breed development program receives 30 percent of the money that goes to quarter horses in Indiana, so it's vital that the breed development committee works hand in hand with the horsemen's association and the racetracks when putting their proposal together, because it intertwines so greatly with the open quarter horse program.

So you can see here what our projected revenue is, what our reserve amount is. One of the problems or successes that quarter horse breed development program has is there's been a couple elements of our program that have almost been too successful the last couple years and has caused us to go over budget for those specific items. So each year we've had to take a really hard look at them and try to tweak them, get us back reined in.

So that's one of the things that has changed in this year's program is changing that supplement in open races to a percentage instead of a flat amount. And it ties in with the overall purses.

Also, you'll see the elimination of sired overnights but an initiation of a bonus program. We think that would serve the program better because it will actually force sired horses to race against open Indiana-breds -- there's kind of a tiered system -- and encourage those horses to become better. So I think long term you'll see an improvement in the quality of sired horses.

2.3

Our stakes program has pretty much stayed the same.

Then there's two applicable rule changes. The purse supplement in open races, which changes it to a percentage, and the sired purse supplement, which is a new element to the program. I also ask that these be addressed as emergency rules, as they do affect the upcoming budget and the race meet.

CHAIRMAN DIENER: Questions from any of the Commissioners?

COMMISSIONER WEATHERWAX: I guess you're just trying to use your money as wisely as you can to promote yourself in the best way you can, but each of you as a horse association have to do that. So you look at this and you say, okay, open races meets, more interest, more participation. You put more money in there than you took it away from last

year. You increased the budget in open from last year. So you don't have to be an Indiana-bred, but they're evidently looking at that as something to help.

2.3

MS. BARNES: One of the things that happened was they looked at the overall program between Indiana-bred races and the open program, and they found that there was a really large gap between Indiana-bred races and open races. So when looking at what is best for the overall program, it was determined that it would be better to kind of shift those open races up a bit. There is a large majority of Indiana-bred horses that are racing in the open program. So when you shift those numbers, it helps the balance between the supplement in open races and everything kind of fits together like a puzzle piece, so . . .

CHAIRMAN DIENER: Any other questions?
(No response)

CHAIRMAN DIENER: All in favor of approving the Quarter Horse Breed Development Advisory

Committee program for 2014 and the implementing rules therein, please signify by saying aye.

THE COMMISSION: "Aye".

CHAIRMAN DIENER: Opposed, same sign.

(No response)

2.3

CHAIRMAN DIENER: It is approved. Thank you very much, Jessica.

MS. BARNES: Thank you.

CHAIRMAN DIENER: Just for George. These breed development committees, their representatives on those committees are appointed by the Governor's office and they work closely with Jessica and others at the Commission, and their work is always underappreciated and rarely noticed and they do a good job.

COMMISSIONER PILLOW: Okay.

CHAIRMAN DIENER: Thank you, Jessica.

MS. BARNES: Thank you.

CHAIRMAN DIENER: Okay. Mr. Keeler, petition from Centaur to expand gambling. I'm sorry. It's getting late in the morning, John.

MR. KEELER: Thank you, Mr. Chairman, members of the Commission. My name is John Keeler. I'm general counsel for Centaur. That's K-e-e-l-e-r. I'll be very brief. This petition seeks to expand our ability to use the Fast Bet Mobile technology at Indiana Grand Racing & Casino, which we now call it.

As you'll recall, we've had this technology in

1 place for over twenty-two months at both Winner's Circle and at Hoosier Park, and the 2 Commission's previously authorized it for our new 3 facility to be in New Haven. In December the 4 5 Commission approved using United Tote, which is the supplier of Fast Bet Mobile, as the totalizer 6 7 company for Indiana Grand. That now makes it 8 possible to have Fast Bet Mobile in use at 9 Indiana Grand, with the permission of the Commission. 10 11 It's really not much more complicated than 12 that, and I'd be happy to answer any questions you 13 might have. 14 CHAIRMAN DIENER: Questions from the 15 Commission? 16 (No response) CHAIRMAN DIENER: Make the motion to approve 17 18 the petition from Centaur to expand the Fast Bet 19 Mobile system at Indiana Downs. 20 COMMISSIONER WEATHERWAX: Second. 21 CHAIRMAN DIENER: All in favor. 22 THE COMMISSION: "Aye". 23 CHAIRMAN DIENER: Opposed, same sign. 24 (No response) 25 CHAIRMAN DIENER: Thank you very much.

MR. KEELER: Thank you.

CHAIRMAN DIENER: Last item on the agenda is the approval of Hoosier Park's standardbred racing officials for 2014. Mr. Gorajec?

MR. GORAJEC: I think Rick Moore is going to speak to this.

CHAIRMAN DIENER: I'm sorry.

MR. MOORE: Thank you, Mr. Chairman.

Rick Moore, vice president and general manager of racing at Hoosier Park.

I'd just like to point out since the time of this petition, very recently, there's two individuals, in fact, one just yesterday I found out, that will not be returning. So I just wanted to point out before you approve this list that the photo finish technician, Amie Alexander, and judges stand tote assistant, Kristen Stahl, will not be returning. When those positions are filled, I will submit those to Mr. Gorajec immediately for his approval, your approval. So I just wanted to point that out.

Thank you very much.

CHAIRMAN DIENER: Any questions about approval of the remaining officials? Do we need delegation of authority on an interim basis for those two open

slots until the Commission meets again? 1 MR. GORAJEC: I think that makes sense, 2 because they're going to be racing in three weeks. 3 CHAIRMAN DIENER: So I think, if I'm reading 4 5 this right, we would approve the list of 2014 standardbred meet officials as submitted and as 6 amended today by Mr. Moore and delegate the 7 8 authority to Mr. Gorajec to approve a photo finish 9 technician and to approve a person to stand as the judges stand tote assistant in the interim. 10 11 MR. GORAJEC: Well, let me ask you this: 12 the approval permanent or do you want me to bring 13 this up at the next Commission meeting for ratification? 14 15 CHAIRMAN DIENER: Permanent and just report to 16 the Commission, please. All in favor. 17 18 THE COMMISSION: "Aye". CHAIRMAN DIENER: Opposed, same sign. 19 20 (No response) 21 CHAIRMAN DIENER: Thank you, Mr. Moore. 22 MR. MOORE: Thank you very much. 2.3 MR. GORAJEC: Just on that point, I would ask 24 Rick, because these two people in particular work 25 so closely with the judges upstairs, that you work

with Tim Schmitz and the judges with regard to finding replacements for these two individuals.

MR. MOORE: Absolutely.

CHAIRMAN DIENER: As I mentioned earlier, we're trying to schedule yet amongst the five of us a date, but we're looking for our next Commission meeting to be that last week of April. Possibly carried over to the first week of May, but hopefully in April. Major thing will be the consideration of the emergency rules for medication and the penalty point provision for multiple violations.

I would encourage any supplemental comments to be filed on or before April 7, and I really would like the thoughts or input, if there is any, from the tracks. I know this is really not your thing, but I keep thinking what's the impact going to be on racing or what's going to be . . . So if you have something other than questions -- I'd rather have some answers, Mr. Elmore -- we really appreciate it.

With that, this meeting stands adjourned. Thank you all.

(The meeting was adjourned at 12:00 p.m. on March 5, 2014.)

STATE OF INDIANA COUNTY OF MARION

I, Michele K. Dew, CRR-RPR, a Notary Public in and for said county and state, do hereby certify that the witnesses herein were by the Chairman duly sworn to tell the truth, the whole truth, and nothing but the truth in the aforementioned matter;

That said meeting/hearing was taken down in stenograph notes and afterwards reduced to typewriting under my direction; and that the typewritten transcript is a true record of the testimony given by said deponents;

That said meeting/hearing complies with all applicable rules;

I do further certify that I am a disinterested person in this cause of action; that I am not a relative of the attorneys for any of the parties.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed my notarial seal this 10th day of March, 2014.

Totale K. Jan
