

IOT Biztalk App Dev - 2020

Who We Are:

A team that provides custom application development on Biztalk platform

Our Mission:

To provide high-quality, innovative solutions to problems using custom application development and industry best practices SDLC processes.

Department:

493021

Manager:

Alvin Wilson

When We Were Formed: {in process}

The IOT Biztalk Development Team was formed September 2018 to provide cost-effective integration in to the State enterprise service bus solution.

What We Do:

BizTalk Server is Microsoft's integration and connectivity server solution. This product helps the State more easily connect disparate systems. BizTalk Server provides connectivity between core systems both inside and outside the State of Indiana.

Our Products:

1051 – Infrastructure Use Fee
1051A – Senior Developer
1051B – Architect

Our Tools:

Biztalk Server	Enterprise Service Bus
Agile SCRUM Methodology	Manage application development projects
Team Foundation Server	Project tracking and code source control
Visual Studio 2015	.NET Integrated Development Environment
BizTalk 360 – monitoring services	

Our Metrics:

A Project Charter accepted by our department and our customer drives our metrics. Within the Project Charter, we define such elements as timeline, scope and cost. We also offer optional software maintenance and support.

Our Customers:

All state agencies. Some the most active customers include FSSA, DCS, DWD, and ISDH.

Our Budget: TBD

Our Growth:

Current Projects:

- ISDH Vitals - Vendor MHIN Data Sharing
- CHE - Scholartrack
