

This program is provided at no cost to the mother and insurance coverage is not required.

Every woman present will be treated in a client-centered manner. Trained staff are present 24/7 to maintain safety, manage difficult situations, and provide support to clients. This program meets the American Society of Addiction Medicine level 3.5 criteria and is accredited by Commission on Accreditation of Rehabilitation Facilities.

If you need help or would like to make a referral, call
(317) 686-5800 x1033.

Pregnant women admitted into the program are allowed to have two of their children ages five and under live with them during their treatment and will go through the following phases:

Phase 1 - Residential treatment for up to four months

- Four hours of treatment are provided each day
- Pre and post natal support
- After birth, mom will bring her newborn
- Drug screens
- Case management
- Parenting training
- Aftercare planning
- Connection to medication assisted treatment

Phase 2 - Home-based family coach services for up to one year

- Parenting support
- Resource connections
- School advocacy for older children who may be at home
- Family support and case management
- Coping skills training to prevent relapse
- Education about Neonatal Abstinence Syndrome and the unique needs of her baby

Helping mothers and children maintain a strong and healthy bond.

This residential addiction treatment program accepts referrals for pregnant women in Indiana who are using opiates and do not have an open case with the Department of Child Services.

Goals of the program are to (1) prevent the opening of a DCS case (2) help addicted, pregnant women have healthy babies and (3) prevent relapse.
