

Early Hearing Detection & Intervention Program (EHDI)

www.hearing.in.gov

(317) 233-1264

Comprehensive (Level 1) and Limited (Level 2)

Audiology Provider Facilities

Updated July, 2020

This list was compiled from a survey sent to audiologists by the Early Hearing Detection and Intervention Program (EHDI) to facilitate families and professionals in finding services for children. The facilities were ranked by equipment available for infant audiologic testing as recommended by the Joint Committee on Infant Hearing (JCIH) and the National Center for Hearing Assessment and Management (NCHAM) and reported by survey responses. Comprehensive (formerly Level 1) facilities have the recommended equipment to provide comprehensive diagnostic audiology services for newborns and young children to determine hearing status.

Limited (formerly Level 2) facilities also provide diagnostic assessment, but are without one piece of the recommended equipment and therefore provide limited diagnostic audiology services.

****Facilities that provide sedated ABR testing**

Comprehensive (Formerly Level 1)

Central Region
