

<b>Title</b>	<b>Inorganic Chemistry Analysis</b>
<b>Test Explanation:</b>	Inorganic parameters such as cyanide, chemical oxygen demand, total organic carbon, ammonia, phosphate, chloride, sulfate, biochemical oxygen demand, solids and nutrients can be used to assess water quality.
<b>Specimen Requirements</b>	<p>Samples will only be accepted from state government agencies, State Institutions and County Health Departments.</p> <p>Contact:  Bharat Patel  Phone: 317-921-5586  Email: Bpatel@isdh.in.gov</p> <p>Please call for information on the best test parameter(s) to address your issue.</p>
<b>Sampling Materials</b>	Plastic and/or glass containers.
<b>Procedural Notes</b>	Please contact the lab for specific instructions, these will be based on the analyses requested.
<b>Shipping Instructions</b>	<p>Please contact the lab on how quickly you need to mail the samples, this will depend on the analyses requested.</p> <p>Mail or return to:  Indiana State Department of Health Laboratories  Chemistry Laboratories  550 W 16th Street, Suite B  Indianapolis, IN 46202-2203</p>
<b>Reporting and TAT</b>	The report will be emailed/faxed or mailed within 30 days after receiving the sample.
