

<b>Title</b>	<b>Total Petroleum Hydrocarbons - Extractable</b>
<b>Test Explanation:</b>	<p>The TPH-E test includes compounds found in kerosene, diesel fuel, hydraulic fluid, and motor oil.</p> <p>Many of these organic compounds are suspected human carcinogens.</p>
<b>Specimen Requirements</b>	<p>Samples for TPH-E analysis will only be accepted from the Indiana State Department of Health and other government agencies.</p> <p>Contact: Mark Starzynski 317-921-5580 for sample containers and instructions.</p>
<b>Sampling Materials</b>	<p>Water must be collected in one liter glass bottles with teflon lined caps, both of which were previously rinsed with solvents.</p> <p>Solids are collected in solvent rinsed pint glass jars with clean aluminum foil between the jar and the cap.</p>
<b>Procedural Notes</b>	<p><b>Water</b> - fill 2 of the provided one liter glass bottles to the top.</p> <p><b>Solid</b> - fill 1 of the provided pint glass jars with the solid.</p>
<b>Shipping Instructions</b>	<p>Samples must be kept refrigerated at 4°C from the time of collection to the time of analysis. Samples should be delivered to the laboratory within 1 day of collection. Ship samples by an overnight service with ice packs and adequate padding to prevent breakage, or hand-deliver to the lab.</p> <p>Indiana State Department of Health  Chemistry Laboratories  550 W. 16th Street, Suite B  Indianapolis, In 46202</p>
<b>Reporting and TAT</b>	<p>Results will be e-mailed to the submitter normally within 30 days.</p>
