

Latent Tuberculosis Infection (LTBI) Reporting for IPs in NBS

When to submit an LTBI Investigation

Patient has a positive TST/IGRA result without evidence of active disease (ex. normal chest imaging)
AND
Patient has been diagnosed with LTBI by a provider

Do not submit an LTBI Investigation for a patient under suspicion of having TB disease

Completing an LTBI Investigation

1. Complete all variables under Case Info, LTBI, Risk Factors, and Therapy
2. Attach relevant documentation (chest imaging, lab results, physician notes) under Supplemental Info
3. If the patient wishes to receive treatment through the local health department, contact the local health department for information on medication ordering
