

In Indiana, 2 babies die every week from suffocation or other sleep-related causes.

Most of these deaths can be prevented.

“No Blankets, pillows, bumper pads, and other items in the crib.”

“Tell everyone how he should sleep. Follow the ABC’s every for every sleep. Nap time and night time.”

“No sleeping on soft surfaces that baby can sink into; like couches, chairs, recliners, or an adult bed. Baby is safe on a firm mattress in his own crib.”

“Keep the air smoke free so baby is breathing fresh, clean air”

Keep your babies safe by putting them **Alone**, on their **Back**, in a **Crib**.
